OF THE SURVEY OF THE

Subdivision lines of

TOWNSHIP 10 SOUTH, RANGE 17 EAST.

Of the Gila and Salt River Base and Meridian,

In the State of Arizona.

EXECUTED BY

Glenn F. Sawyer, U.S. Surveyor,

and

Theodore Vander Meer, U.S. Transitman,

In the capacity of U. S. Surveyors, under Special Instructions dated October 24, 1923, issued by the United States Surveyor General to govern surveys included in Group No. 125, Arizona, which were approved by the Commissioner of the General Land Office, November 3, 1923, and Assignment Instructions dated November 16, 1923.

Resurvey and Survey commenced December 31, 1923.

Resurvey and Survey completed January 11, 1924.

2 BOOK 3700

Resurveys and surveys herein described were executed on dates shown on diagram on page 1 hereof, by Glenn F. Sawyer, U.S. Surveyor, using Young and Sons light mountain transit No. 8478, and Theodore VanderMeer, U.S. Transitman, using Buff and Buff Light mountain transit No. 9208, each equipped with full vertical circle and Smith solar attachment; unless otherwise specified, all azimuth determinations were accomplished with the solar attachments.

December 28, 1923: We examine the adjustments of the transits and correct all errors; then, to test the solar apparatus, by comparing their indications, resulting from observations, made during a.m. and p.m. hours with a meridian established by Polaris observation, proceed as follows:

December 29, 1923: At camp in SW. $\frac{1}{4}$ of sec. 31, T. 10 S., R. 18 E., G. and S.R. Base and Meridian, Arizona, latitude, $32^{\circ} 31' 10''$ N., longitude, $110^{\circ} 32' 49''$ W., at 1h.4.9m.a.m., l.m.t., we observe Polaris at western elongation, making four observations, two each with the telescope in direct and reversed positions, and mark the mean point in line thus determined on a peg driven firmly in the ground, 5 chs.N.

Azimuth of Polaris at western elongation = $1^{\circ} 18' 10''$.

At 8h.45m. a.m., l.m.t., we lay off the azimuth of Polaris $1^{\circ} 18'$ to the east, and mark the meridian thus determined by a tack driven firmly in a peg, in the ground, 5 chs.N.

At 9h.0m. a.m., l.m.t., we set off $32^{\circ} 31' N.$ on the lat. arcs; $23^{\circ} 14' S.$ on the decl. arcs; and determine a meridian with the solars, which we find to agree with the true meridian.

At apparent noon, with the lat. arcs unchanged, we observe the sun on the meridian; the resulting reading of each decl. arc is $23^{\circ} 14' S.$, which agrees with the computed decl. of the sun.

At 3h.0m. p.m., l.m.t., with the lat. arcs unchanged, we set off $23^{\circ} 13' S.$ on the decl. arcs, and determine a meridian with each solar, which we find to agree with the true meridian.

As all of the solar observations during the usual hours of solar work come within $1' 30''$ of the true meridian, we conclude that the adjustments of the instruments are satisfactory.

Unless otherwise specified, all measurements are made with Lufkin steel tapes, 5 chs. in length, compared with a Lufkin 1 ch. standard steel tape and found correct. The measurements are made on the slope, the vertical angle determined and the slope measurements properly reduced to true horizontal distances.

Chains

The East boundary of T.10 S., R. 17 E. was surveyed in 1877 by T.F.White, U.S.D.S., establishing all corner monuments thereon with a common reference to areas on both sides of the line.

In 1904, W.B.Alexander, U.S.D.S. resurveyed the entire line, reconstructing all the original cor. monuments in their original positions, and retaining their original common reference to areas on both sides of the line.

No other resurvey and no retracement of this range line is of record.

The following notes describe a resurvey of the entire line. Section 6, the N. $\frac{1}{2}$ of sec.7, and the S. $\frac{1}{2}$ of sec.31, being accepted surveyed areas, the portions of the range line forming the W. bdr. thereof is not subject to rectification except that the cor. monuments on the range line referring thereto are subject to such changes as will alter their reference to areas E. of line only.

In this resurvey, alter the existing $\frac{1}{4}$ sec.cors. of secs. 31 and 36, 7 and 12, 1 and 6, and the cor. of secs. 1, 6, 7 and 12 to refer to areas E. of line only, destroy all other $\frac{1}{4}$ sec. and sec.cor. monuments on the range line, and reestablish cor. monuments at intervals of 40 chs. in northing, counting from the S. end of the line.

The reestablished cors. retain their original common reference except in the S. half mile, and the N. $1\frac{1}{2}$ miles of the range line, where they refer to areas W. of line only.

RETRACEMENT FOR RESURVEY.

RESURVEY.

The std.cor. of T.10 S., Rs.17 and 18 E., on the 2nd Std. Par.S., reconstructed in original position by W.B. Alexander in 1904 is a granite stone 8x6x5 ins.above ground, firmly set, marked with 6 notches on each of E., W. and N. faces, and T.10 S., R.17 E. on N.face, and witnessed by a mound of stone, 2 ft.base, $1\frac{1}{2}$ ft. high, N. of cor. No bearing trees.

Thence, N.0°13'W., on true line, on E. bdy.of sec.36. Over rolling land, thru. scattering undergrowth. Old road, brs.NE. to Oracle and SW.to Redington.

The North bdy. of T.10 S., R.17 E., was surveyed in 1877 by J.L.Harris, U.S.D.S. establishing all sec. and $\frac{1}{4}$ sec. cors. thereon with a common reference to areas on both sides of the line.

The entire line was retraced and resurveyed in 1904 by W. B. Alexander, U.S.D.S., but no change was made in the reference of any of the cors.

No other retracement or resurvey of this Tp. bdy. is of record.

The following note's describe a resurvey of the west five miles of the line, reconstructing the old $\frac{1}{4}$ sec.cor.of secs. 2 and 35, and the old cor. of secs. 2, 3, 34 and 35, and changing their reference to areas N. of line only, reconstructing the old $\frac{1}{4}$ sec.cor. of secs. 3 and 34, the cor. of secs. 3, 4, 33 and 34, and the cor. of secs. 5, 6, 31 and 32 with original reference, reestablishing the $\frac{1}{4}$ sec.cor. of sec. 2 only at midpoint of N. bdy. of said sec., and reestablishing all the missing sec. and sec.cors. on the west half of the Tp. bdy. by proportional measurement with original reference.
