FIELD NOTES

OF THE SURVEY OF ~~###~~

Part of South Bdy. of Township 17 South, Range 7 East

and

Boundary of Papago Indian Reservation

along Summit of the Baboquivari Mountains

thru

Parts of Township 18 South, Range 7 East

Part of Township 18 South, Range 8 East

and thru

Township 19 South, Range 7 East

of the Gila and Salt River Base and Meridian,

In the State of Arizona.

EXECUTED BY

Otis O. Gould

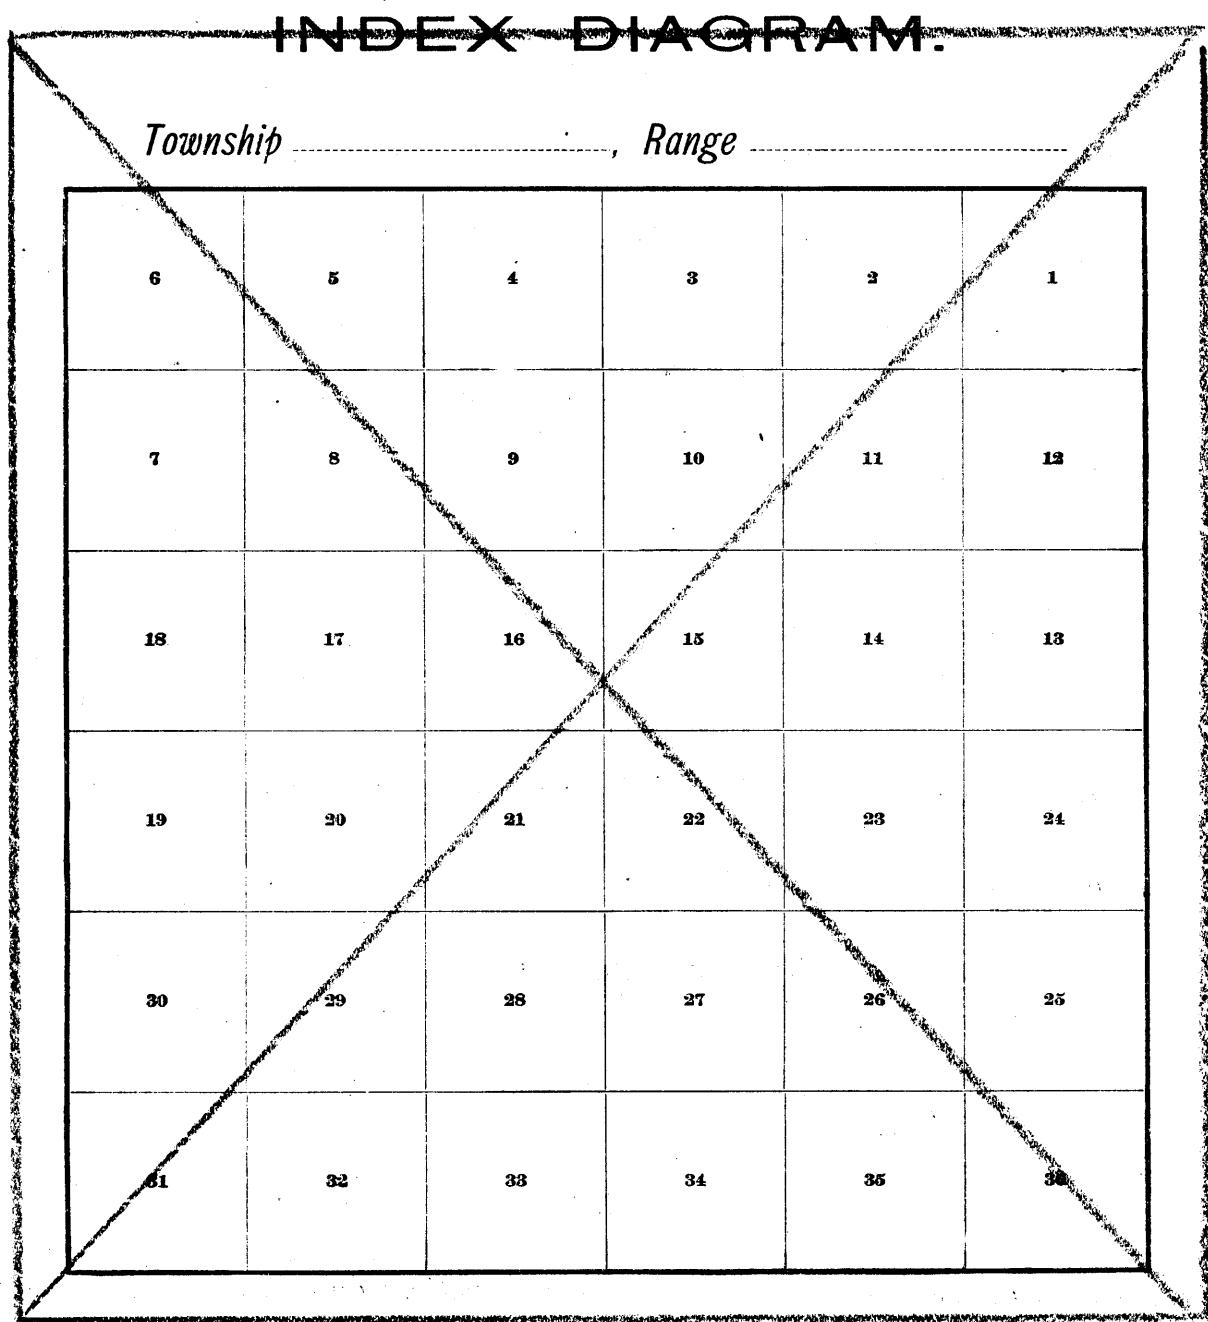

U. S. Transitman

In the capacity of U. S. Surveyor, under Special Instructions dated Sept. 25, 1919,
issued by the United States Surveyor General to govern surveys included in Group
No. 100 Arizona, which were approved by the Commissioner of the General Land
Office, October 22, 1919, and Assignment Instructions dated December 2, 1925.
for Group 134, Arizona.

Survey commenced March 2, 1926.

Survey completed March 25, 1926.
executed with surveys of Group No. 134, Arizona.

Surveys herein described were executed on dates shown on diagram on page 1 hereof, by Otis O. Gould, U.S. Transitman, using Young and Son solar transit No. 8541. The instrument is equipped with a full vertical circle and Smith solar attachment; unless otherwise specified all azimuth determinations are accomplished with the solar attachment.

Feb. 21, 1926; Examine the adjustments of the instrument and correct all errors; then, test the solar apparatus by comparing its indications resulting from observations made during a. m. and p.m. hours with a meridian established by Wm. H. Thorn U.S. Cadastral Engineer; as described in Book "B" of Group No. 34.

Feb. 21, 1926; At 9h00m.a.m.app.t.set off $31^{\circ} 49\frac{1}{2}'$ N. on the lat. arc, and $10^{\circ} 38'$ S. on the decl. arc, and determine a meridian with the solar which falls within 1' of the true meridian.

At app. noon with the lat. arc unchanged, observe the sun on the meridian; the resulting reading of the decl. arc is $10^{\circ} 35\frac{1}{2}'$ S., which agrees with the computed decl. of the sun.

At 3h.00m.p.m.app.t.with the lat. arc unchanged; set off $10^{\circ} 32\frac{1}{2}'$ S. on the decl. arc, and determine a meridian with the solar which falls within 1' of the true meridian.

As all of the solar observations during the usual working hours of solar work come within 1' of the true meridian, conclude that the adjustments of the solar are satisfactory.

Unless otherwise specified all measurements are made with a Lufkin steel tape 5 cks. in length, compared with a Lufkin standard tape and found correct. The measurements are made on the slope, the vertical angles determined, and the slope measurements properly reduced to true horizontal distances.

Survey of part of the south Bdy. of Tps. 17 S. Ranges 7 E.

3

Chains.	From the reestablished corner of Tps. 17 S. Ranges 7 & 8 E., described in Book "D" of Group No 134.

Survey of part of the boundary of the Papago Indian Reservation.
(Along the summit of Baboquivari Mountain Range.) 5

For the purpose of marking the boundary so it can be readily followed, monument the angle points thereon with small mounds of stone, - the minimum size of these mounds being 1 ft. base, 6in. high, and frequently very much larger.

From the closing corner of Tps. 17&18 S. R. 7 E. and Initial Monument of the Papago Indian Reservation hereinbefore described, Survey said boundary along the summit of Baboquivari Mountain Range, on the various courses as described as follows.

Along 1 st. mile of P.L.R. bdy. in T 18 S. R. 7 E.

 S. R.7 E. surveyed due west.Closing cor. of Tps. 19 & 20 S. R.7 E.
 established at this point, as de-scribed in book "F" of Group No. 134.
 This point is the terminus of the
 Papago Indian Reservation boundary
 as called for in Assignment Instruc-
 tions of group 134, Arizona.

The continued satisfactory adjustment of the instrument throughout the survey of the Papago Indian Reservation Boundary is indicated from a solar test made March 23, 1926. as follows;

At the same station at which the solar test was made on Feb. 21, 1926, hereinbefore described, set off $31^{\circ}49\frac{1}{2}'$ N. on the latitude arc, and $1^{\circ}12'$ N. on the decl. arc, and at 3h. 00m. P.M., app. time determined a meridian with the solar, which agrees with the meridian established by Wm. H. Thorn, U. S. Cadastral Engineer, as described in Book D of Group No. 134.

Survey of part of the boundary of the Papago Indian Reservation.
22 (Along the summit of the Baboquivari Mountain Range.)

GENERAL DESCRIPTION.

The northern portion of this Papago Indian Reservation Boundary, surveyed under this group is at an elevation ranging from 5500 ft. above sea level to 6300 ft., and is more or less smooth on the summit. The Pass on the north side of Fresnal Peak is only at an elevation of 4500 ft. above sea level, and has a trail running over the top of it. From this Pass on south excepting the last three miles, the summit is very rough and mountainous with a series of rough rocky peaks and bluffs. In some places it was accessible only by the use of ropes. Fresnal Peak is at an elevation 7300 ft. above sea level and Baboquivari Peak is at an elevation of 7740 mft. above sea level. The predominant forest species are oak, scrub pine and juniper. The oak and pine being quite dense in places, but the juniper is very scattering. There is no water on the summit, but there is some water in the canyons a mile or so from the summit, and quite a number of cattle are grazed on the slopes.

FIELD ASSISTANTS. to

Otis O. Gould, U.S. Transitman.

CERTIFICATE OF U.S.TRANSITMAN.

I, Otis O. Gould, U.S.Transitman, hereby certify upon honor that, in pursuance of special instructions received from the U. S. Surveyor General, for Group 100, Arizona, bearing date of the 25th day of September, 1919, I have well, faithfully, and truly in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of
the Boundary of the Papago Indian Reservation
and the
South Boundary of Township 17 South, Range 7 East

of the Gila and Salt River Base and Meridian, in the State of Arizona, which are represented in the foregoing field notes as having been executed by me, and under my direction; and that all the corners of said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the U. S. Surveyor General, for Group 100, Arizona and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey.
Otis O. Gould.

Place: Phoenix, Arizona.
Date: April 13, 1926.

Otis O. Gould
U.S. Surveyor
U.S. Transitman

APPROVAL.

OFFICE OF THE U.S.SUPERVISOR OF SURVEYS

Denver, Colo., June 11, 1927.

The foregoing field notes of the survey of
the Boundary of the Papago Indian Reservation thru Parts of T.18S., R.7E., thru Part of T.18S., R.8E. and thru T.19S., R.7E.
and Part of the South Boundary of Township 17 South, Range 7 East,
of the Gila and Salt River Base and Meridian, in the State of Arizona.

executed by Otis O. Gould, U.S. Transitman ~~under Group No. 100, Arizona~~,
in accordance
with special instructions dated Sept. 25, 1919 for Group No. 100, Arizona, ¹⁹, having been critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys they describe, are hereby approved.

Franklin Johnson
U.S. Supervisor of Surveys.

I certify that the foregoing transcript of the field notes of the above-described surveys in
, has been correctly copied from the original notes on file in this office.
