FIELD NOTES

OF THE SURVEY OF THE

North Boundary of T. 3 N., R. 9 W.,

and

Subdivisions of T. 3 N., R. 9 W.

3880

Of the Gila and Salt River Base & Meridian,

In the State of Arizona.

EXECUTED BY

Dupree R. Averill

3880

In the capacity of U. S. Surveyor, under Special Instructions dated October 23, 1928, issued by the District Cadastral Engineer to govern surveys included in Group No. 156, Arizona, which were approved by the Commissioner of the General Land Office, November 12, 1928, and Assignment Instructions dated Jan. 5, 1929.

Survey commenced April 26, 1929

Survey completed May 13, 1929

on dates shown thereon.Accepted surveys.

HANDBOOK OF SURVEYING
PREP.

Survey commenced April 26, 1929 and executed by Dupree R. Averill, U.S. Surveyor, on dates shown on diagram on page 1 hereof, using Buff & Buff transit No. 17992. The instrument is equipped with full vertical circle and Smith solar attachment, and was approved by the District Cadastral Engineer conditional upon satisfactory field test.

The instrumental adjustments are examined and all errors corrected, then to test the Solar apparatus by comparing its indications resulting from a.m., and p.m., observations with a meridian determined by Polaris observation, proceed as follows:

April 25, 1929. At camp in sec. 11, T. 2 N., R. 9 W., Gila and Salt River Base and Meridian, Arizona, initial latitude $33^{\circ} 31\frac{1}{2}'$ N., longitude $113^{\circ} 09\frac{1}{2}'$ W., of Greenwich, at 5h. 26m. a.m., app.t., observe Polaris at eastern elongation, making two readings with the telescope in direct and reversed positions, deflecting an angle to the left of $1^{\circ} 17\frac{1}{2}'$; equal to the azimuth of Polaris, and noting the meridian thus determined by reference to a prominent point on Buck Horn Peak 5 miles distant.

At 8h. 00m. a.m., app.t., setting off $33^{\circ} 31\frac{1}{2}'$ N. on the latitude arc, $13^{\circ} 11'$ N. on the declination arc, determine a meridian with the solar which agrees with the true meridian.

At appt., noon, with the latitude arc unchanged, observe the sun upon the meridian. The resulting declination is $13^{\circ} 14'$ N. which agrees with the computed declination.

At 4h. 00m. p.m., app.t., with the latitude arc unchanged and a setting of $13^{\circ} 17\frac{1}{2}'$ N. on the declination arc the solar meridian is noted to coincide with the true meridian.

Continued satisfactory adjustment of the transit throughout the survey of the township is indicated from a final test of solar apparatus as follows:

May 13, 1929. At the station described above, set off $33^{\circ} 31\frac{1}{2}'$ N. on the latitude arc, $18^{\circ} 27\frac{1}{2}'$ N. on the declination arc, and at 4h. 00m. p.m., app.t., determine a meridian with the solar attachment which agrees with the true meridian.

May 14, 1929. At 8h. 00m. a.m., app.t., with the latitude arc unchanged, a setting of $18^{\circ} 37\frac{1}{2}'$ N. on the declination arc, the meridian determined by solar observation lies $1'$ of arc to the left of the true meridian.

All measurement, unless otherwise specified, is made with a Lufkin 5 ch. steel tape, first compared with a Lufkin standard steel tape and found correct. Measurement is made upon the slope, slope angles are determined by clinometer readings and slope distances are reduced to their true horizontal equivalents for entry in the field notes.

and 23 bears S. 35° 49' W., and flag at sec. cor. "D"
bears S. 88° 03' W.

By solution of triangle "D-E-F" the length of "D-E" is
35.22 chs. S. 89° 58' E.

Survey of Subdivision lines of T. 3 N., R. 9 W.

- Chains By solution of triangle "B-D-G" the length of "B-D" is 59.25 chs. S. $88^{\circ} 03' W.$. The base "A-B" of triangulation hereinbefore described in notes of sub. line bet. secs. 11 and 12, is 20.95 chs. S. $89^{\circ} 42' W.$, and point "A" is 2.40 chs. N. $0^{\circ} 1' W.$, from the cor. of secs. 11, 12, 13 and 14 "C". The traverse "D-B-A-C" bet. the sec. cors. "D" and "C" is therefore N. $88^{\circ} 03' E.$, 59.25 chs., N. $89^{\circ} 42' E.$, 20.95 chs., and S. $0^{\circ} 1' E.$, 2.40 chs., the latitude and departure of which are 27 lks. S., and 80.16 chs. E. respectively. The true course and dist. of sub. line "C-D" are therefore N. $89^{\circ} 48' W.$, 80.16 chs., and the random line extended will fall 23 lks. N. of the cor. of secs. 11, 12, 13 and 14 "C".
-
- 35.22 Triang.. flag "E". Continue line and measurement by chaining.
- 40.00 Set temp. $\frac{1}{4}$ sec. cor. Discontinue chaining.
- 80.16 Fall 23 lks. N. of the cor. of secs. 11, 12, 13 and 14. Thence N. $89^{\circ} 48' W.$, on true line, bet. secs. 11 and 14. Over mountainous land, thru scattering undergrowth. Measurement to $\frac{1}{4}$ sec. cor. by triangulation hereinbefore described. Ascend over SE. slope.
- 5.00 (Approx.) Foot of cliffs, bearing NW. & SW., facing SE. Asc. about 550 ft. to
- 15.00 (Approx.) Spur ridge, from Big Horn Peak, brs. NW. and SE. Ascend along S. slope
- 21.00 (Approx.) Top of Big Horn Peak, brs. N. about 2.00 chs. dist. Desc. about 600 ft. over cliffs facing SW.
- 30.00 (Approx.) Foot of cliffs, bearing NW. and SE. Descend about 100 ft. over NW. slope.
- 35.00 (Approx.) Head of gulch, course NW. Ascend about 100 ft. over NE. slope to
- 40.08 Set an iron post, 3 ft. long, 1 in. in diam., over a cross (X) marked on small ledge of rock, and raise a mound of stone 3 ft. base, 30 ins. high, around post, for $\frac{1}{4}$ sec. cor., marked on brass cap
- $\frac{1}{4} \text{ S } 11$
 $\frac{1}{4} \text{ S } 14$
1929
- Continue line and measurement by chaining.
Asc. 40 ft. over NE. slope.
- 42.16 Ridge, bears N. $70^{\circ} W.$, and S. $70^{\circ} E.$.
Desc. 35 ft. over SW. slope to
- 44.94 A point 10 lks. S. of triang. flag "E". Discontinue chaining. Desc. about 1050 ft. over precipitous broken SW. slope to
- 80.16 The cor. of secs. 10, 11, 14 and 15.
Land, mountainous.
Soil, rocky, 4th rate.
Timber, none.
Undergrowth, greasewood and cacti.

GENERAL DESCRIPTION

The greater portion of the township is comprised of desert land, varying from a sandy loam to a gravelly and rocky nature. Big Horn Peak, the highest point of the range of the same name lies in sections 11 and 14, the mountain range extending to the east and north. This portion of the township is very rough and broken, and carrying only a shallow surface soil.

The timber consists of a stunted growth of palo-verde and ironwood; undergrowth is a desert greasewood and the various cactus growths. There is no live water.

Homestead settlements have been entered in sections 31 and 32, and small portions of land cleared of brush.

CERTIFICATE OF UNITED STATES SURVEYOR.

I, Dupree R. Averill, U. S. Surveyor, hereby certify upon honor that, in pursuance of special instructions received from the District Cadastral Engineer, for Group 156, Arizona bearing date of the 23rd day of October, 1928, I have well, faithfully, and truly in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of

the North Boundary and
Subdivision Lines
of

Township 3 North, Range 9 West of the Gila and Salt River Base and Meridian, in the State of Arizona, which are represented in and by diagram on page 1 hereof the foregoing field notes as having been executed by me, and under my direction; and that all the corners of said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the District Cadastral Engineer, for Group 156, Arizona and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey.

Place: Phoenix, Arizona
Date: June 13, 1929

U. S. Surveyor.

APPROVAL.

OFFICE OF U. S. SUPERVISOR OF SURVEYS,

Denver, Colo., January 13, 1930

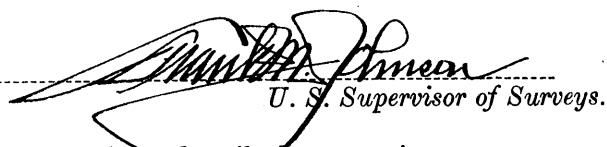

The foregoing field notes of the survey of

the Subdivision Lines

and

North Boundary of

Township 3 North, Range 9 West
of the Gila and Salt River Base and Meridian, in the State of Arizona
executed by Dupree R. Averill, U.S. Surveyor
under his special instructions dated October 23, 1928, for Group 156, Arizona, having been critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys they describe, are hereby approved.

U. S. Supervisor of Surveys.

I certify that the foregoing transcript of the field notes of the above described surveys in

has been correctly copied from the original notes on file in this office.

U. S. Supervisor of Surveys.
