Meanders of Left Bank of Colorado River

thru Part of

Fractional Township 29 North, Range 23 West

Of the Gila and Salt River Base and Meridian,

In the State of Arizona

EXECUTED BY

Dupree R. Averill, U.S. Surveyor

In the capacity of U. S. Surveyor, under Special Instructions dated July 15, 1929, issued by the District Cadastral Engineer to govern surveys included in Group No. 160 Arizona, which were approved by the Commissioner of the General Land Office, August 1, 1929, and Assignment Instructions dated January 29, 1930.

Survey commenced February 7, 1930.

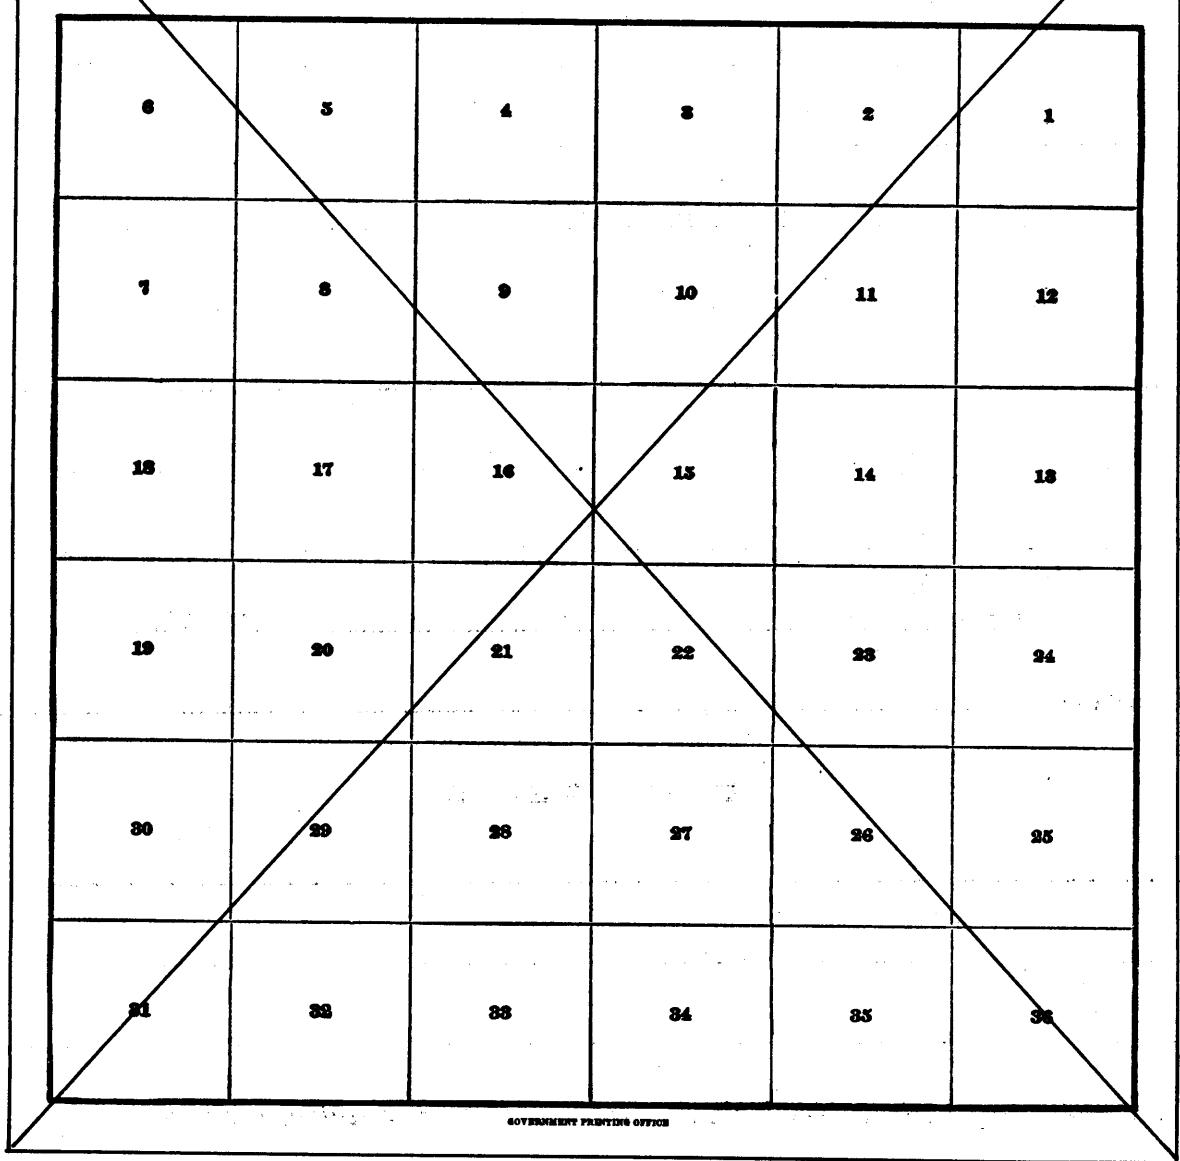

Survey completed April 12, 1930.

Feb. 7 Lines surveyed under Group No. 160 Ariz., by D. R. Averill, U.S. Surveyor,
3 in 1930. Month and day shown in red. Page number of notes in green.

Lines of accepted Arizona surveys.

----- *Unsurveyed.*

Areas of accepted surveys, 25 per accepted plats on file.

The surveys herein described were executed on dates shown on diagram on page 1 hereof by Dupree R. Averill, U. S. Surveyor, using Buff & Buff solar transit No. 17992, equipped with full vertical circle and the Smith solar attachment. The horizontal limb of the transit is provided with two double verniers placed opposite to each other and each reading to single minutes of arc, which is also the least count of the verniers of the latitude and declination arcs. Unless otherwise specified all azimuth determinations are accomplished with the solar attachment.

The instrument was examined, tested and approved by the District Cadastral Engineer for Arizona and California, January 29, 1930, conditional upon satisfactory field tests.

PRELIMINARY TEST.

February 5, 1930:

At camp, near cor. of secs. 11, 12, 13 and 14, T. 27 N., R. 20 W., G. & S. R. B. & M., Arizona, latitude $35^{\circ} 44\frac{1}{2}'$ N., longitude $114^{\circ} 23\frac{1}{2}'$ W., examine the adjustments of the instrument and correct all errors, then, to test the solar apparatus by comparing its indications resulting from solar observations made during a.m. and p. m. hours with a meridian determined by Polaris observations, proceed as follows:

At 10 h. 30 m., p. m., l. m. t., observe Polaris at western elongation, making four observations, two each with the telescope in direct and reversed positions, and marking the mean point in the line thus determined by a tack in a stake driven firmly in the ground 10.00 chs. N.

Azimuth of Polaris at western elongation - $1^{\circ} 18' 49''$.

February 6, 1930:

At 7 h. 30 m., a. m., lay off the azimuth of Polaris $1^{\circ} 19'$ to the east and mark a point in the true meridian thus determined by a tack in a stake driven firmly in the ground 10.00 chs. N.

At 8 h. 0 m., a. m., app. t., set off $35^{\circ} 44\frac{1}{2}'$ N. on the lat. arc, $15^{\circ} 39\frac{1}{2}'$ S. on the decl. arc, and determine a meridian with the solar, which agrees with the true meridian.

At app. noon, with the lat. arc unchanged, observe the sun on the meridian, and obtain a reading of $15^{\circ} 38'$ S. on the decl. arc, which agrees with the computed declination of the sun.

At 4 h. 0 m., p. m., app. t., with the lat. arc unchanged, set off $15^{\circ} 33\frac{1}{2}'$ S. on the decl. arc, and determine a meridian with the solar, which agrees within $1'$ with the true meridian.

As all of the solar observations made during the usual hours of solar work define positions for meridian which agree within $1'$ with the true meridian, conclude that the instrument is in satisfactory adjustment.

Unless otherwise specified all measurements are made with a Lufkin steel tape, 5 chs. in length, compared with a Lufkin standard steel tape and found correct. The measurements are made on the slope, vertical angles determined by clinometer or transit readings, and the slope measurements properly reduced to true horizontal distances for entry in the field notes.

Survey of the section

7th Standard Parallel North thru Part (Completion) of R.19 W. BOOK 3882

1930

raise a mound of stone, 3 ft. base, 2 ft. high, N. of cor.

Land, mountainous.
 Soil, rocky, 4th rate.
 Timber, none.
 Undergrowth, greasewood and cacti.

West, on true line, on the S. bdy. of sec. 31.
 Over mountainous land, thru scattered undergrowth.
 Precipitous slopes render chaining west from sec. cor.

impracticable, therefore triangulate as follows:

Set flag "B" ahead on line.

From "B" measure a base

S. 2° 47' E., 8.18 chs. to point "C".

Bearing from "C" to flag "A"

at 65.62 ch. station on S. bdy. of sec. 32 is N. 73° 22' E.

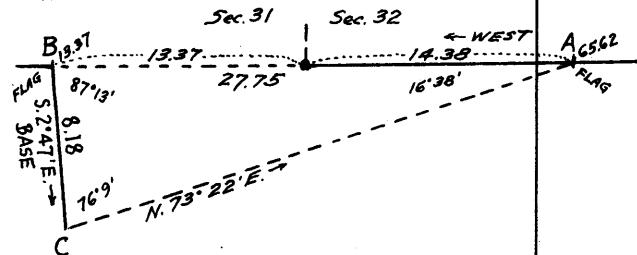

Vertical angle "B" to std. cor. of secs. 31 & 32 is -44°.

Triangulated dist. - "A" to "B" = 27.75 chs. West.

Chained dist. - "A" to sec. cor. = 14.38 "

Dist. - sec. cor. to flag "B" = 13.37 chs. West.

Ascent - sec. cor. to flag "B" = 870 ft.

Survey of the 7th Standard Parallel North thru R. 22 W.

GENERAL DESCRIPTION.

Township 29 North, Range 23 West, Arizona, is made fractional by the Colorado River, the center of which is the common boundary of the States of Arizona and Nevada. The Colo. River crosses and recrosses the range line between ranges 22 and 23 West, thus causing Frac.T.29 N., R.23 W. to be divided into two parts, one part consisting of secs. 1, 2, 12 and 13, and the other is sec. 36. Sec. 36 is unsurveyed by reason of the fact that the portion of the range line east thereof, and the meanders of the left bank of the Colo.River adjoining said sec., were not surveyed under Group 160, Ariz.

The surface of secs. 1, 2, 12 and 13, surveyed and subdivided as described in the foregoing notes, is very rough, broken and mountainous, draining southwesterly into the Colo.River, which in this vicinity flows southeasterly thru Black Canyon, with an average water width of about 6 chs.

The soil varies from tertiary gravels to an igneous rock formation, 3rd and 4th. rate.

There is no timber in this part of the Tp.

A scattered undergrowth of greasewood, cacti and catclaw is prevalent over most of the land.

There are no settlers or improvements, and no roads.

No indications of valuable minerals were observed within the boundaries of this Tp.

Except the water of the Colorado River, there is no permanent flow of water in any of the watercourses, and there are no springs.

No part of said secs. has any agricultural or grazing value.

This Tp. is adjoined on the west by unsurveyed Frac.Ts. 23 and 24 S., R. 65 E., Nevada.

BOOK 3882

CERTIFICATE OF UNITED STATES SURVEYOR

I, Dupree R. Averill, U. S. Surveyor, hereby certify upon honor that, in pursuance of special instructions received from the District Cadastral Engineer, for Group 160 Arizona bearing date of the 15th day of July, 1929, I have well, faithfully, and truly in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of the 7th Standard Parallel North in Ranges 19, 20, 21, 22 and Frac. 23 West, the East, North and West bdrs. of Frac. T. 29 N., R. 22 W., the North bdy. and Subdivision lines of Frac. T. 29 N., R. 23 W., and Meanders of Left Bank of the Colorado River in Fractional Township 29 North, Range 23 West of the Gila and Salt River Base and Meridian, in the State of Arizona, which are represented in *and by diagram on page 1 hereof* the foregoing field notes as having been executed by me, and under my direction; and that all the corners of said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the District Cadastral Engineer, for Group 160 Ariz., and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey.

Place: Phoenix, Arizona U. S. Surveyor.
Date: May 15, 1930

APPROVAL

OFFICE OF U. S. SUPERVISOR OF SURVEYS,

Denver, Colo., October 10, 1930

The foregoing field notes of the survey of the 7th Standard Parallel North, thru Part of Range 19 West, and thru all of Ranges 20, 21, 22 and Frac. 23 West, the East and North bdrs., and Part of the West bdy. of Frac. T. 29 N., R. 22 W., the North bdy. and Subdivision lines of Frac. T. 29 N., R. 23 W., and the Meanders of Left Bank of the Colorado River thru part of Frac. T. 29 N., R. 23 W.

of the Gila and Salt River Base & Meridian, in the State of Arizona
executed by Dupree R. Averill, U. S. Surveyor

under his special instructions dated July 15, 1929 for Group 160, Arizona, having been critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys they describe, are hereby approved.

J. M. Johnson U. S. Supervisor of Surveys.

I certify that the foregoing transcript of the field notes of the above described surveys in

, has been correctly copied from the original notes on file in this office.

U. S. Supervisor of Surveys.
