- _____ Resurveyed by Benjamin J. Kinsey, U.S. Surveyor on dates shown thereon. Notes herein.
- _____ Retraced by Benjamin J. Kinsey, U.S. Surveyor on dates shown thereon. Notes herein.
- _____ Surveyed by Benjamin J. Kinsey, U.S. Surveyor under this group. Notes and dates in other books.
- _____ Accepted surveys.

The resurveys and surveys herein described were executed on dates shown on diagram on page 2 hereof, by Benjamin J. Kinsey, U.S. Surveyor, using a Buff "Rocky Mountain Favorite" solar transit No. 18,000, with U-shaped standards, 4½ inch horizontal circle, 4 inch vertical circle and improved Smith solar attachment.

The instrument was examined, tested on the true meridian at the Federal Building at Phoenix, Arizona, found correct and approved by the District Cadastral Engineer for Arizona and California, January 3, 1929, conditional upon satisfactory field tests. All azimuth determinations are accomplished with the solar attachment except the special observations upon Polaris and the sun for meridian upon which to test the solar apparatus as stated in the field notes.

All measurements are made with a Lallie steel tape, 5 chains in length, compared with a Lufkin standard steel tape and found correct. The measurements are made on the slope, the vertical angle determined and the slope measurements properly reduced to true horizontal distances for entry in the field notes.

PRELIMINARY FIELD TEST
of
Buff transit No. 18,000
by
Benjamin J. Kinsey, U.S. Surveyor.

January, 9, 1929; at station in camp, in sec. 34, T. 8 N., R. 4 W., Gila and Salt River Base and Meridian, Arizona, latitude 34° 00' N. and longitude 112° 39½' W., 112° 40' W., examine the adjustments of the transit and find no errors.

At 0h. 20m., a.m., l.m.t., observe Polaris at western elongation, making four observations, two each with the telescope in direct and reversed positions, and marking the line thus determined by setting a tack in top of a stake driven firmly in the ground about 5 chs. North.

Azimuth of Polaris at western elongation : 1° 17' 33"

Lay off the azimuth of Polaris 1° 17½' to the east and mark the meridian thus determined by a tack set in a stake about 5 chs. North.

At 9h. 00m., a.m., app. t., with latitude arc set at 34° 00' N. and the decl. arc set at 22° 04' S, determine a meridian with the solar which is found to agree with the true meridian.

At 12h. 00m., app. noon, with latitude arc unchanged, observe the sun on the meridian; the resultant reading of the decl. arc is 22° 04' S, which agrees with the computed declination of the sun.

At 3h. 00m., p.m., ^{app. t.} with lat. arc unchanged, set off 22° 02' S on decl. arc and determine a meridian with the solar which is found to agree with the true meridian.

As all of the observations taken during the usual hours of solar work agree within 1' of the true meridian conclude that the adjustments of the instrument are satisfactory.

OBSERVATIONS

for

Time and Latitude.

January 9, 1929:

in approximate latitude 34°00'N, and longitude 112°40'

W. make a meridian observation of the sun for time and latitude, observing simultaneously the altitude of the sun's lower limb and the transit of the sun's west limb, reversing the telescope and observing simultaneously the altitude of the sun's upper limb and the transit of the sun's east limb:

Mean observed altitude: 33° 53' 05"

Reduced latitude: 34° 03' 00"

Mean watch time of obsn: 12h. 37m. 50s.

Watch fast of local mean time: 30m. 42s.

January 10, 1929:

at same station as described above, make an altitude observation on Polaris at upper culmination for latitude making four observations, two each with the telescope in direct and reversed positions:

Watch fast of 105th meridian standard time by comparison 0m. 09s.

Mean watch time of obsn.: 6h. 46m. 00s.

Mean observed vertical angle: 35° 04' 08"

Reduced latitude: 33° 59' 50"

January 22, 1929:

at same station as described above, make an altitude observation on Polaris at upper culmination for latitude making four observations, two each with the telescope in direct and reversed positions:

Watch agrees exactly with 105th meridian standard time by comparison with Western Union Tel. clock at Wickenburg, Arizona.

Mean watch time of obsn.: 5h. 28m. 00s.

Mean observed vertical angle: 35° 04' 08"

Reduced latitude: 33° 59' 50"

Resurvey of

Second Standard Parallel North thru Ranges 3 and 4 West.

Chains

The 2nd. Std. Par. N. was surveyed thru Ranges 3 and 4 W., by J.B. McLaughlin, U. S. D. S., in 1883, and no retracement or resurvey of the Parallel in either of said ranges is of record.

There being no accepted surveyed areas on either side of the Parallel in Ranges 3 and 4 W., the line is subject to rectification in alinement and measurement.

The following notes describe an independent resurvey of the Parallel due West thru Ranges 3 and 4 W., from the std. cor. of Ts. 9 N., Rs. 2 and 3 W., which was reestablished in 1919. In this resurvey, std. $\frac{1}{4}$ sec. and sec. cors. are reestablished alternately, at 40 ch. intervals and at point where the resurveyed Parallel intersects the East bdy. of T. 8 N., R. 5 W., a closing cor. of Ts. 8 and 9 N., R. 4 W. is established. Destroy all original std. cors. found after obtaining bearing and distance from each to its corresponding reestablished position.

The west half of the South Bdy. of T.8 N., R.4 W., was surveyed by S.M. Foreman, U.S.D.S., in 1872. No retracement or resurvey of any part of this line is of record. The following notes describe a dependant resurvey of the west half of S. bdy. of T.8 N., R.4 W.

Retracement for Resurvey.

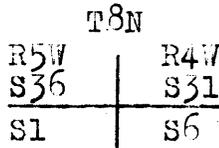

From original cor. of Ts. 7 and 8 N., Rs. 4 and 5 W., hereinafter described. East, on random line, on S.Bdy. of T.8 N., R.4 W. searching diligently at record intervals for the original cor. monuments. Fail to find any trace of original cors. and at (Record dist.) Diligent search in this vicinity fails to reveal any trace of original cor. of secs. 3, 4, 33 and 34. Set temp. cor. of said secs. The East half of this Tp. bdy. being unsurveyed, the only method of resurvey of the west half is to reproduce the record course and dist. of East, 240.00 chs., reestablishing the 1/4 sec. and sec. cors. alternately at 40 chs. intervals, counting from the cor. of Ts. 7 and 8 N., Rs. 4 and 5 W.

Part of the East Boundary of Township 8 North, Range 5 West.

Chains

The north half mile bet. secs. 7 and 12, on E. bdy. of T. 8 N., R. 5 W., was surveyed in 1882 by W.A. Hancock, U.S.D.S. in connection with his survey of part of the subdivision lines of T. 8 N., R. 4 W. and said deputy surveyor also at same time established the cor. of secs. 7, 12, 13 and 18 on the Tp. bdy. The original cor. of secs. 1, 6, 7 and 12 was established by Hancock by survey of sub. line bet. secs. 6 and 7, T. 8 N., R. 4 W., due west with convergency allowance to locate said sec. cor. theoretically North from Tp. cor. and the cor. of secs. 7, 12, 13 and 18 was established by him in the same manner. The north half of line bet. secs. 7 and 12, was surveyed by Hancock due South from the cor. secs. 1, 6, 7 and 12, the $\frac{1}{4}$ sec. cor. of secs. 7 and 12 established at 40 chs. from said sec. cor., and Tp. bdy. discontinued at the $\frac{1}{4}$ sec. cor.

The remainder of the East Bdy. of T. 8 N., R. 5 W., was surveyed, and the N $\frac{1}{2}$ half mile bet. secs. 7 and 12 re-surveyed, by J.F. Hesse, U.S.D.S., in 1909.

No other retracement or resurvey of any part of this Tp. bdy. is of record.

The following notes describe a resurvey of the north two miles of the east bdy. of T. 8 N., R. 5 W.

Retracement for resurvey.

From original cor. secs. 7, 12, 13 and 18, hereinafter described.

40.13 N. 0° 27' W., on random line, bet. secs. 7 and 12 (S $\frac{1}{4}$).
Intersect the $\frac{1}{4}$ sec. cor. of secs. 7 and 12; hereinafter described.

True course and dist. of S $\frac{1}{4}$ of line bet. secs. 7 and 12, are therefore N. 0° 27' W., 40.13 chs.

Thence,

40.09 N. 0° 04' E., on random line, bet. secs. 7 and 12, (N $\frac{1}{4}$).
Fall 8 lks. W. of the cor. secs. 1, 6, 7 and 12, hereinafter described.

True course and dist. of N $\frac{1}{4}$ of line, bet. secs. 7 and 12, are therefore N. 0° 11' E., 40.09 chs.

North, on random line, on E. Bdy. of sec. 1, (S $\frac{1}{4}$).

40.24 Intersect original $\frac{1}{4}$ sec. cor. secs. 1 and 6, hereinafter described.

True course and dist. of S $\frac{1}{4}$ of E. Bdy. of sec. 1 are therefore North, 40.24 chs.

Thence,

31.74 North, on random line on N $\frac{1}{4}$ of E. Bdy. sec. 1.
Intersect the witness cor. to closing cor. of Ts. 8 N., Rs. 4 and 5 W., hereinafter described. This witness cor. is of record as being set 1.50 chs. S. from the true point for closing cor. of Ts. 8 N., Rs. 4 and 5 W.

33.24 Intersect the true point for C.C. of Ts. 8 N., Rs. 4 and 5 W. on the 2nd. St. Par. N. 2.11 chs. S. 89° 53' W., from the std. cor. of Ts. 9 N., Rs. 4 and 5 W., hereinafter described.

True course and dist. of N $\frac{1}{4}$ of E. Bdy. of sec. 1, are therefore North, 33.24 chs.

Resurvey.

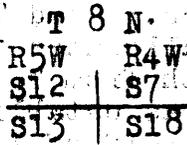

The original cor. of secs. 7, 12, 13 and 18 is a stone 14 x 10 x 6 ins. above ground, firmly set, mkd. with 2 and 4 grooves on N. and S. faces, from which a md. of stone 3 ft. base, 2 ft. high brs. W. 3 ft. dist.

Township 8 North, Range 4 West

GENERAL DESCRIPTION.

The lands within this township lie on the SW. slope of the Wickenburg Mountains, and the surface is rolling and mountainous, with an elevation above sea level ranging from 2200 ft. in the SW. to 3500 ft. in the NE. portion.

The drainage of the greater part of the South and SE. parts is southwesterly towards the Hassayampa River in the vicinity of Wickenburg, Arizona. The North part of the Tp. drains into said river, which has a general southwesterly course, entering the Tp. on N. bdy. of sec. 3, and leaving on W. bdy. of sec. 7.

Blue Tank, Hamblin and KING Solomon Washes, are the principal tributaries of the Hassayampa River in this Tp.

The soil, except for strips along the river, is rocky, 4th rate. In the river bottom land is a 2nd rate loam.

Timber is scarce and is of the common desert variety and size, chiefly mesquite, paloverde and ironwood, with cottonwood along the river and the main washes.

Undergrowth is scattering and consists of cacti, catclaw, greasewood and ocotillo.

Water, except in the Hassayampa River, is scarce. In sec. 24, water has been developed in Blue Tank Wash, and a windmill brings water to sec. 26 in moderate quantities.

No mines are working in the Tp. at this time, but evidence of great mineral activity in days gone by is plentiful.

Settlers reside in secs. 2, 3, 5, 9, 24 and 26.

The road from Constellation to Wickenburg crosses this Tp., There are numerous other roads, but few in good condition for travel.

The lands are chiefly suitable for mining and grazing. Goats and sheep, and a very few cattle graze here at this time.

Wickenburg, Arizona, situated on the Santa Fe R.R. and the Hassayampa River, and U.S. Highway No. 89, about one mile SW. from the SW. cor. of this Tp., is the nearest railroad station and postoffice.

The Maricopa-Yavapai County boundary line bearing NW. and SE. crosses secs. 31 and 32 of this Tp., the greater part of the Tp. being in Yavapai County, Arizona.
