# FIELD NOTES

of the

resurvey of the East boundary and a portion of the South boundary, and  
the resurvey and survey of a portion of the subdivisional lines, com-  
pleting the survey of Township 13 South, Range 11 East,

Of the Gila and Salt River Meridian,

In the State of Arizona

## EXECUTED BY

William E. Hiester, U. S. Surveyor,

In the capacity of U. S. Surveyor, under Special Instructions dated December 1, 1931, issued by the District Cadastral Engineer to govern surveys included in Group No. 172, which were approved by the Commissioner of the General Land Office December 29, 1931, and Assignment Instructions dated December 4, 1931.

Survey commenced January 29, 1932.

Survey completed February 9, 1932.

## Resurvey of the East Boundary of T.13 S., R.11 E.

1B

**Chains** The survey and resurvey was executed with a light mountain transit made by Buff and Buff, Serial No. 19423, constructed in accordance with the standard specifications of the General Land Office. The horizontal circle has a diameter of  $4\frac{1}{2}$  ins. with two double opposite verniers reading to single minutes; the vertical circle has a diameter of 4 ins., with one double vernier reading to single minutes. The instrument is equipped with the improved Smith solar attachment; radius of latitude arc  $2\frac{1}{2}$  ins. and of the declination arc  $3\frac{1}{2}$  ins. each with verniers reading to single minutes. The instrument was in good condition, and having been placed in satisfactory adjustment prior to beginning the survey, and tested and found free from appreciable error, was approved by the district cadastral engineer on Nov. 15, 1931. I examine all the instrumental adjustments before making the field tests hereinafter recorded.

The direction of all lines were determined by the solar transit method. The measurements were made with a Lallie steel tape 5 chs. in length, graduated every link for the first 100 lks. and the balance at intervals of 10 lks. The tape was tested by comparison with a Lufkin standard and found correct. The measurements were made on the slope and the vertical angle of each interval was ascertained by clinometer in good adjustment; the horizontal equivalents are entered in the field record.

The data furnished with the special instructions gives the geographic position for the SE.cor. of T.13 S., R.11 E., as follows: latitude  $32^{\circ}15'00''$ N., and longitude  $111^{\circ}09'48''$ W.

Jan. 29, 1932, in camp near the cor. of secs. 26, 27, 34 and 35, at 11h 01m p.m., l.m.t., or 11h 25m 47s by my watch, which reads correct 105th meridian time as determined by radio. I observe Polaris at western elongation, making two sights each with the telescope in direct and reversed positions, and place a tack at the mean point on a peg driven firmly in the ground 10 chs. N.

Jan 30: I lay off the azimuth of Polaris  $1^{\circ}14'47''$  and make a meridian mark on a second peg to the east of the mean point in the line determined by the observation.

Jan 30: at the cor. of secs. 1, 2, 35 and 36 on S. bdy. of the Tp., in order to verify the latitude and the reading of my watch, I make a meridian observation of the sun, first setting on the lower limb, then, after reversal of the instrument, setting on the upper limb and noting the transit of the east limb as follows:

Mean observed altitude-----	$39^{\circ}56'19''$
Reduced latitude-----	$32^{\circ}15'08''$
Mean watch time of observation-----	12h 39m 00s
Watch fast of l.m.t-----	$25''44''$

Every 30 min. from 7 to 10.30 a.m., and from 1.30 to 4 p.m., I make proper settings on the arcs of the solar attachment and ascertain that the resulting orientation of the instrument, when compared with a meridian established by Polaris observation has a maximum error of less than  $1'30''$ .

I repeat the tests of the arcs daily by noon observation and verify the meridional indications at frequent intervals throughout the survey.

## Resurvey of the East Boundary of T.13 S., R.11 E.

Chains      The east and south boundaries and a portion of the subdivisional lines of T.13 S., R.11 E., were executed by Philip Contzen, U.S. Deputy Surveyor in 1903.

The following notes describe an independent resurvey of the south three miles, a dependent resurvey of the north three miles of the east boundary.; a dependent resurvey of the east three miles of the south boundary, and a survey and resurvey of a portion of the subdivisions, completing the subdivisional survey of T.13 S., R. 11 E.

Beginning at the cor.of Tps.13 and 14 S., R.11 E.

North, on a random line, along the E.bdy.of T.13 S., R.11 E., setting temp.cors. at 40 and 80 chs. dist.

- 239.42      The cor.of secs.13,18,19 and 24.
- 278.79      The witness  $\frac{1}{4}$  sec.cor.of secs.13 and 18.
- 319.61      From this point the cor.of secs.7,12,13 and 18, bears W.2 lks.dist.
- 359.79      From this point the  $\frac{1}{4}$  sec.cor.of secs.7 and 12, bears W.3 lks.dist.
- 399.75      From this point the witness cor.to secs.1,6,7 and 12, bears W.7 lks.dist.
- 439.98      The  $\frac{1}{4}$  sec.cor.of secs.1 and 6.
- 479.91      From this point the cor.of Tps.13 S., R.11 and 12 E., bears W.2 lks.dist.

I return to the cor.of Tps.13 and 14 S., R.11 E., which is an iron post, 3 ins.diam., standing firmly 6 ins.above the top of a mound of stone, 3 ft.base,  $1\frac{1}{2}$  ft.high, mkd. and witnessed as described in the official record.

Thence

North, on a true line, along the E.bdy.of sec.36.

Over mountainous land, through scattering undergrowth.

Descend 24 ft.over NW.slope.

- .30      Road, bears NE.and SW.
- 1.50      Road, bears NE.and SW.
- 5.30      Wash, 50 lks.wide, course SW.; asc.307 ft.over SE.slope.
- 14.02      The cor.of Tps.13 and 14 S., R.12 E., which is an iron post, 3 ins.diam., standing firmly 4 ins.above the top of a mound of stone, 2 ft.base, 1 ft.high, marked and witnessed as described in the official record.
- 30.10      Top of spur, slopes SW.; desc.138 ft.over NW.slope.
- 39.85      The original  $\frac{1}{4}$  sec.cor.of secs.31 and 36, which is a basalt stone, 16x10x5 ins.above ground, marked and witnessed as described in the official record.
- I destroy all evidence of this cor.
- 40.00      Set an iron post, 3 ft.long, 1 in.diam., 16 ins.in the

## GENERAL DESCRIPTION.

The SE. portion of T.13 S., R.11 E., lies on the W. slopes of the Tucson Mountains. The general elevation of the township is about 3000 ft. above sea level. The land is sandy and rocky, covered with scattering desert growth, of ironwood, mesquite, palo verde, catclaw and cactus. Saguaro is also found on the mountain slopes.

Dense forests of saguaro, ironwood, mesquite and palo verde is found at a lower elevation. There are two adobe houses within the township, one near the central part of sec. 25 and one in the NE. of sec. 27. There are no known settlers living within this township.

There are several mining claims and prospect holes scattered along the mountain slopes. The land is suitable for recreational purposes only.

## **FIELD ASSISTANTS.**

## CERTIFICATE OF UNITED STATES SURVEYOR

I, William E. Hiester, U. S. Surveyor, hereby certify upon honor that, in pursuance of special instructions received from the District Cadastral Engineer for Arizona bearing date of the 1st. day of December, 1931, I have well, faithfully, and truly in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, <sup>re</sup> surveyed ~~and resurveyed~~ <sup>and resurveyed</sup> a portion of the East boundary and a portion of the South boundary, and resurveyed and surveyed a portion of the subdivisional lines, completing the survey of Township 13 South, Range 11 East,

of the Gila and Salt River Meridian, in the State of Arizona, which are represented in the foregoing field notes as having been executed by me, and under my direction; and that all the corners of said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the District Cadastral Engineer for Arizona and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey and resurvey.

*William E. Hiester*  
Glendale, California. U. S. Surveyor.  
March 30, 1933.

## APPROVAL

OFFICE OF U. S. SUPERVISOR OF SURVEYS,

Denver, Colorado, September 16, 1933.

The foregoing field notes of the <sup>re</sup> survey of the East boundary and a portion of the South boundary, and the resurvey and survey of a portion of the subdivisional lines, completing the survey of Township 13 South, Range 11 East, of the Gila and Salt River Meridian, in the State of Arizona,

executed by William E. Hiester, U. S. Surveyor,

under his special instructions dated December 1, 1931, <sup>XIX</sup>, having been critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys and resurveys they describe, are hereby approved.

*John D. Johnson*  
U. S. Supervisor of Surveys.

I certify that the foregoing transcript of the field notes of the above-described surveys in \_\_\_\_\_, has been correctly copied from the original notes on file in this office.

U. S. Supervisor of Surveys.
