# FIELD NOTES

of the

Dependent Resurvey of the Third Standard Parallel North,  
through Range 11 East, and Survey of the East Boundary;

Dependent Resurvey of the South Boundary;

Survey and Dependent Resurvey of the West Boundary, and

Survey of the Subdivisional Lines of Township 12 North,

Range 11 East.

Of the Gila and Salt River Base and Meridian,

In the State of Arizona.

## EXECUTED BY

Theodore Vander Meer, U.S. Transitman.

Under special instructions dated March 16, 1933, which provided  
for the surveys included under Group No. 178, bearing the approval of the  
Commissioner of the General Land Office under date of April 3, 1933  
and assignment instructions dated January 3, 1933.

Survey commenced May 8, 1933.

Survey completed July 12, 1933.

## Resurvey of the 3rd. Stan. Par. No., through R.11 E.

BOOK 4019

**Chains**

The survey was executed with a light mountain solar transit, made by the Buff and Buff Co., serial No. 9977, constructed in accordance with the standard specifications of the General Land Office. The horizontal circle has a diameter of 4 $\frac{1}{2}$  ins., with two double verniers reading to single minutes; the vertical circle has a diameter 4 ins. with one double vernier reading to single minutes; the telescope has fixed stadia wires, ratio 1:132, with a focal constant of 1.2 links. The instrument is equipped with the improved Smith solar attachment; radius of latitude arc 3 $\frac{1}{2}$  ins., and of declination are 3 ins., each with verniers reading to single minutes. The instrument was in good condition, and having been placed in satisfactory adjustment prior to beginning the survey, and tested and found free from appreciable error, was approved by the district cadastral engineer on January 3, 1933. All the instrument adjustments were examined before making the field tests hereinafter described.

The directions of the lines were determined by solar transit method. The measurements were determined with a Lallie steel tape 5 chs. in length, graduated every link for the first 100 links and the balance at intervals of 10 links. The tape was tested by comparison with a Lufkin standard steel tape and found correct. The measurements were made on the slope, and the vertical angle of each interval was ascertained with a clinometer in good adjustment; the horizontal equivalents are entered in the field note record. Some of the distances were determined by triangulation as shown in the record.

The data furnished with the special instructions gives the geographical position of the SE. cor. of T.12 N., R.11 E., as follows: latitude 34°22'14"N., and longitude 111°8'14"W.

May 8, 1933: in camp, which is situated in sec. 31, T.12 N., R.11 E., about 8 chs. from the E. bdy. and 23 chs. from the S. bdy. of the sec.; at 4h 37m. a.m., l.m.t., I observe Polaris at eastern elongation, making two sights each with telescope in direct and reversed positions, and mark the mean point in the line thus determined by a tack in a stake driven firmly in the ground about 5 chs. N. of my station. After sunrise, I lay off the azimuth of Polaris 1°16'44" to the west, and mark a point in the meridian on another stake about 5 chs. N.

At 30 minute intervals from 7 to 10:30 a.m. and from 1:30 to 5 p.m., app.t., I make proper settings on the arcs of the solar attachment and ascertain that the resulting orientation of the instrument, when compared with the meridian established by observation on Polaris, has a maximum error of less than 1' 30".

I repeat the tests of the arcs daily by noon observation, and verify the meridional indications at frequent intervals throughout the survey.

The 3rd. standard parallel North through R.11 E., was surveyed in 1874 by C.B. Foster, U.S.D.S. and resurveyed in 1893 by D. Drummond, U.S.D.S., and again by Philip Gutzem, U.S. Deputy Surveyor, in 1900.

From the standard cor. of Ts.13 N., Rs.11 and 12 E.,

1933

from which .

The original bearing trees, which are as described in the official record, being dead, I establish new bearing trees as follows:

A yellow pine, 5. ins. diam., bears N.51 $\frac{1}{4}$ °E., 28 lks. dist.  
marked T 13 N R 11 E S 31 S C B T

A yellow pine, 6 ins. diam., bears N.79°W., 36 lks. dist.  
marked T 13 N R 10 E S 36 S C B T

Land, rolling and mountainous.

Soil, sandy and rocky, 2nd. and 3rd. rates.

Timber, pine, fir, and oak.

Undergrowth, manzanita, oak, and sage.

## Resurvey of the S. Bdy. of T.12 N., R.11 E.

	Chains	The south boundary of T.12 N., R.11 E., was surveyed by W.H.Thorn, U.S.Surveyor in 1903, as part of the boundary of what was then known as the Black Mesa Forest Reserve. The section corners were monumented with 4-in. iron posts, designated "Boundary Posts" and numbered consecutively from E. to W. At the midpoints bet. the Bdy. Posts, $\frac{1}{4}$ sec. corners were established, exception S. bdy. of sec. 31 where it is 40.00 chs. W. side of sec. 31.
		A portion of this boundary was retraced by C.L.Campbell, U.S.D.S. in 1904. No other retracement or resurvey is of record. A portion of the boundary being defective in measurement, it became necessary to make a resurvey as described in the following notes.
		From the cor. of T.12 N., R.10 and 11 E.,
		East, on a random line on S. bdy. of sec. 31.
44.79	Fall 13 lks. S. of the $\frac{1}{4}$ sec. cor.	Thence from $\frac{1}{4}$ sec. cor.
		East, on a random line on S. bdy. of sec. 31.
40.04	Fall 2 lks. S. of the old cor. of secs. 31 and 32.	Thence from cor.,
		East, on a random line on S. bdy. of sec. 32.
39.88	Intersect the old $\frac{1}{4}$ sec. cor.	Thence from $\frac{1}{4}$ sec. cor.
		East, on a random line on S. bdy. of sec. 32.
39.93	Intersect the old cor. of secs. 32 and 33.	Thence from cor.,
		East, on a random line on S. bdy. of sec. 33.
39.94	Fall 2 lks. S. of the old $\frac{1}{4}$ sec. cor.	Thence from $\frac{1}{4}$ sec. cor.,
		East, on a random line on S. bdy. of sec. 33.
40.05	Fall 2 lks. S. of the cor. of secs. 33 and 34.	Thence from cor.
		East, on a random line on S. bdy. of sec. 34.
39.95	Intersect the old $\frac{1}{4}$ sec. cor.	Thence from $\frac{1}{4}$ sec. cor.
		East, on a random line on S. bdy. of sec. 34.
39.81	Intersect the old cor. of secs. 34 and 35.	Thence from cor.,
		East, on a random line on S. bdy. of sec. 35.
39.92	Fall 5 lks. N. of the old $\frac{1}{4}$ sec. cor.	Thence from $\frac{1}{4}$ sec. cor.
		East, on a random line on S. bdy. of sec. 35.

## Resurvey of the S. Bdy. of T.12 N., R.11 E.

BOOK 4019

	Chains 39.70	Fall 12 lks. N. of the old cor. of secs. 35 and 36. Thence from cor. East, on a random line on S. bdy. of sec. 36.
	40.21	Fall 3 lks. N. of the old witness $\frac{1}{4}$ sec. cor. Thence from cor. East, on a random line on S. bdy. of sec. 36.
	37.95	Fall 2 lks. S. of the old boundary post No. 29 and cor. of T.11 $\frac{1}{2}$ N.E. #### Final Test of Solar

For final test of instrument, reference is made to the test made on July 13, 1933, preliminary to the Indian Allotment Survey in unsurveyed township 11 N., R.10 E., Group 166, Arizona.

#### General Description

The elevation of this township ranges from about 6000 ft. above sea level along the west portion of the South boundary to about 8000 ft. along the rim of the Mogollon mesa which crosses the township diagonally from section 36 to section 18.

To the north of the rim, on the Mogollon mesa, the land is mostly rolling and drains northerly toward Clear Creek canyon, the elevation along the north boundary being about 600 ft. below the top of the mesa.

To the south of the rim, the descent is more abrupt, the land being rolling and mountainous and the drainage southerly.

The soil is mostly sandy with clay subsoil and rocky in places.

There is a medium heavy growth of timber over most of the township, consisting of pine, fir, oak, aspen, alder, and juniper.

No evidence of mineral was noted except a trace of iron. The land is watered by several springs and small streams.

The residents are Elwood Pyle in sec. 31 and Sumner Holden in sec. 14. There is a Forest Ranger Station in sec. 12.

## CERTIFICATE OF UNITED STATES SURVEYOR.

I, Theodore Vander Meer, U.S. Transitman, hereby certify upon honor that, in pursuance of special instructions received from the District Cadastral Engineer for Arizona.

bearing date of the 16th day of March, 1933, I have well, faithfully, and truly in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, ~~dependent~~ resurveyed the Third Standard Parallel North, through Range 11 East, and surveyed the East Boundary, dependently resurveyed the South Boundary; surveyed and dependently resurveyed the West Boundary, and surveyed the subdivisional lines of Township 12 North, Range 11 East.

of the Gila and Salt River Base and Meridian, in the State of Arizona, which are represented in the foregoing field notes as having been executed by me, and under my direction; and that all the corners of said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the District Cadastral Engineer for Arizona, and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey and resurvey.

Glendale, California.  
August 9, 1934.

U. S. Transitman

## APPROVAL.

OFFICE OF U. S. SUPERVISOR OF SURVEYS,

Denver, Colorado, January 21, 1935.

The foregoing field notes of the dependent resurvey of the Third Standard Parallel North, through Range 11 East, and survey of the East boundary; dependent resurvey of the South boundary; survey and dependent resurvey of the West boundary, and survey of the subdivisional lines of Township 12 North, Range 11 East, of the Gila and Salt River Base and Meridian, in the State of Arizona.

executed by Theodore Vander Meer, U. S. Transitman

under his special instructions dated March 16, 1933, having been critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys and resurveys they describe, are hereby approved.

J. L. Johnson  
U. S. Supervisor of Surveys.

I certify that the foregoing transcript of the field notes of the above-described surveys in \_\_\_\_\_, has been correctly copied from the original notes on file in this office.

U. S. Supervisor of Surveys.
