— Lines surveyed under this group.

— Lines resurveyed under this group.

[Image] Areas surveyed as per accepted plats on file.

Township 38 North, Range 12 West

ECC 4036

1 B

The surveys hereinafter described were executed with light-mountain solar transits made by Young & Sons, Serial No. 8478, used by John L. Warboys, U.S.C.E., and No. 8592, used by Ben D. Proctor, U.S.T. The instruments were constructed in accordance with the standard specifications of the General Land Office. The instruments have horizontal circles with a diameter of $4\frac{1}{4}$ ins., with two double verniers placed opposite each other reading to single minutes and have vertical circles with a diameter of 5 ins., with one double vernier reading to single minutes. The telescopes have fixed stadia wires with a ratio of 1-132 and a focal constant of 1.5 lks.

The instruments are equipped with improved Smith solar attachments, radii of latitude arcs $3\frac{1}{4}$ ins. and of declination arcs 3.87 ins., each with verniers reading to single minutes. The instruments were in good condition, and having been placed in satisfactory adjustment prior to beginning the survey, were approved by the district cadastral engineer on May 21, 1934.

The directions of the lines were determined by solar transit method. The measurements were made off the slope with Lallie and Lufkin steel tapes, 5 chs. in length, graduated at intervals of one link for the first 100 lks. and the balance at intervals of 10 lks. The tapes were tested by comparison with a Lufkin standard and found correct. The vertical angle of each slope measurement was ascertained with a clinometer in good adjustment; the horizontal equivalents are entered in the field note record.

The data furnished with the special instructions gives the geographic position of the SE. cor. of the Tp. as follows: latitude $36^{\circ}38'29''$ N., longitude $113^{\circ}32'35''$ W.

May 24, 1934; at camp at the 1 sec. cor. of secs. 9 and 16, latitude $36^{\circ}42'N.$, longitude $113^{\circ}36'W.$, using transit No. 8592, at $8^{\text{h}}23^{\text{m}}52^{\text{s}}$ p.m., l.m.t., we make an hour angle observation on Polaris, east of the meridian, two each with the telescope in direct and reversed positions, reading the deflection angle from a flagpole north-westerly to Polaris.

Local mean time of observation--- $8^{\text{h}}23^{\text{m}}52^{\text{s}}$
 Mean horizontal angle from Polaris to flag-- $76^{\circ}46.1'$
 Azimuth of Polaris----- $0^{\circ}21.9'$
 True bearing of flag----- $N.77^{\circ}08.0'W.$

Every 30 min. from 7 to 11 a.m. and from 1 to 5 p.m., we make proper settings on the arcs of the solar attachments and ascertain that the resulting orientation of the instruments, when compared with the meridian established by Polaris observation, have a maximum error of less than $1'30''$.

We repeat the tests of the arcs daily by noon observation and verify the meridional indications frequently during the period of the survey.

Observed magnetic declination is $16^{\circ}15'E.$

2

RESURVEY OF SOUTH BOUNDARY OF T.39 N., R.12 W.

Chains

The E. 3 miles of the S. bdy. of T.39 N., R.12 W., were surveyed in 1915 by T.B. Matthews, U.S.S.; the W. 3 miles by W.E. Hiester, U.S.S., in 1924. No resurveys are of record.

The following notes describe the resurvey of the whole line, the alteration of the original corner monuments to refer to areas N. of the line, only, and the establishment of a new set of corner monuments for areas S. of the line.

Beginning at the cor. of Tps. 38 and 39 N., Rs. 11 and 12 E., hereinafter shown changed to refer to T.39 N., only.

West, on random line, along the S. bdy. of T.39 N., R.12 W.

- 40.02 A point 8 lks. S. of the $\frac{1}{4}$ sec. cor.
- 80.03 A point 16 lks. S. of the cor. of secs. 1, 2, 35 and 36.
- 120.04 A point 24 lks. S. of the $\frac{1}{4}$ sec. cor.
- 160.02 A point 32 lks. S. of the cor. of secs. 2, 3, 34 and 35.
- 200.02 A point 40 lks. S. of the $\frac{1}{4}$ sec. cor.
- 240.04 A point 48 lks. S. of the cor. of secs. 3, 4, 33 and 34.
- 280.05 A point 48 lks. S. of the $\frac{1}{4}$ sec. cor.
- 320.04 A point 48 lks. S. of the cor. of secs. 4, 5, 32 and 33.
- 360.04 A point 48 lks. S. of the $\frac{1}{4}$ sec. cor.
- 400.04 A point 48 lks. S. of the cor. of secs. 5, 6, 31 and 32.
- 440.01 A point 48 lks. S. of the $\frac{1}{4}$ sec. cor.
- 480.99 A point 48 lks. S. of the cor. of Tps. 38 and 39 N., Rs. 12 and 13 W., hereinafter described.

Returning to the cor. of Tps. 38 and 39 N., Rs. 11 and 12 W., which is an iron post, 3 ins. diam., projecting 12 ins. above ground, firmly set and mkd. on brass cap and witnessed as described in the official record, I alter the corner to refer to areas in T.39 N., Rs. 11 and 12 W., only, by changing the marks on the brass cap to read:

	T39N
S36	S31
R12W	R11W
	S6
	T38N
	1934
	1915

and destroy original mound of stone and raise a mound of stone, 3 ft. base, 2 ft. high, N. of cor.

Thence

N. $89^{\circ}53'W.$, on true line, along S. bdy. of sec. 36.

Asc. 15 ft. over rocky SE. slope; through scattering scrub cedar timber and scattering undergrowth.

- 1.06 Point of intersection of line run North bet. Tps. 38 N., Rs. 11 and 12 E.; closing cor. set at this point herein-after described.

Asc. 12 ft.

RESURVEY OF SOUTH BOUNDARY OF T.39 N., R.12 W. EBOOK 4036 3

	Land: low rolling hills. Soil: gravel and rock. Timber: scrub cedar, pinon. Undergrowth: sage, cactus. Fair grass.	
		RESURVEY
		EAST BOUNDARY OF T. 38 N., R.12 W.
		The east boundary of T.38 N., R.12 W., was surveyed in 1915 by T.B.Matthews, U.S.Surveyor. No resurveys are of record.
		As no areas are returned as surveyed adjoining the line it is subject to an independent resurvey, which the following notes describe. Preliminary to the resurvey a re-tracement of the line is made, which finds all corners substantially as described in the official record and destroys them, the iron posts being re-dated and used on the new line.
		Beginning at the cor. of Tps. 37 and 38 N., Rs. 11 and 12 W., hereinafter described,
		North, on random line, bet. Rs. 11 and 12 W.
40.04	A point 7 lks. W. of the $\frac{1}{4}$ sec. cor.	
80.08	A point 13 lks. W. of the cor. of secs. 25,30,31 and 36.	
120.12	A point 24 lks. W. of the $\frac{1}{4}$ sec. cor.	
160.15	A point 35 lks. W. of the cor. of secs. 19,24,25 and 30.

FINAL SOLAR TEST

The continued satisfactory adjustment of solar apparatus is indicated from tests described in Book "B" of this Group.

GENERAL DESCRIPTION

The tp. lies in the NW. part of Arizona, about 45 miles Southerly from the town of St. George, Utah, by road, via Wolf Hole, Ariz. A main road from Wolf Hole runs south-easterly through secs. 1 and 12 to Mt. Trumbull and Tuweep. A branch of this road runs southerly along the E. bdy. of the tp. to Parashont, Ariz. Another road runs south-westerly through the tp. from Wolf Hole to Cane Spring, Grand Gulch, Hobble Canyon and Pakoon. Other roads, wood roads and secondary roads, reach every section of the Tp.

Land is low rolling hills in the S. portion and the same with considerable flat areas in the N. Soil is nearly all sand, with a considerable rock content in the S., with increasing loam and clay contents in the N. portions.

The SW. portion of the tp. drains westerly, the remainder north-easterly. There are no large or noteworthy water channels; considerable of the rainfall sinks into the ground at once. It is probable that many of the washes, drains and arroyos are of recent origin, following heavy grazing and the building of roads. The north-central part of the tp. drains into natural sinks, where it is lost by seepage and evaporation. Some work has been done on one or two of the sinks in the hope of a water supply, a hope not yet realized. There is no water in the tp.

There is considerable of a type of timber suitable for fenceposts and fuel, the variety of juniper locally (and erroneously) known as scrub cedar. There are also a few pinons. Undergrowth on the flats is sagebrush, with the same and a little buckbrush and other varieties on the hills.

No mineral was observed. There are no residents.

The area is used for grazing only. Grass is fair except where the soil is too shallow or rocky.

Sea-level elevation is about 5,000 ft.
