FIELD NOTES

OF THE SURVEY OF THE

SOUTH, WEST AND NORTH BOUNDARIES, AND RESURVEY OF PART
OF THE EAST BOUNDARY OF TOWNSHIP 11 NORTH, RANGE 17 EAST

4103

Of the GILA AND SALT RIVER Meridian,

In the State of ARIZONA

EXECUTED BY

Albinus N. Kimmell, U.S.Cadastral Engineer, Charles E. Hunter,
U.S.Transitman and Bert E. Wakeman, Public Land Surveyor

4103

In the capacity of U. S. Surveyor s, under Special Instructions dated June 18
1934, issued by the District Cadastral Engineer to govern surveys included in Group
No. 191, which were approved by the Commissioner of the General Land
Office, July 6, 1934, and Assignment Instructions dated August 22 and
Sept. 12, 1935.

Survey commenced September 11, 1935

Survey completed November 3, 1935

U. S. GOVERNMENT PRINTING OFFICE 6-1517

Fort Apache Indian
Reservation

Resurvey of the W. Bdy. of T. 11 N., R. 18 E.

The surveys and resurveys herein described were executed with Buff solar transit No. 18002, Young and Sons solar compass No. 6808 and Gurley solar transit No. 20120, all constructed in accordance with the standard specifications of the General Land Office, each with verniers reading to single minutes.

All instruments were placed in satisfactory adjustment prior to beginning the survey and approved by the District Cadastral Engineer on June 28, 1935.

The measurements were made with Lufkin or Lallie steel tapes, 5 chs. in length, graduated every link for the first hundred links and thereafter at intervals of 10 links. Each tape was tested prior to and during the progress of the survey by comparison with a Keuffel and Esser standard steel tape and found correct. All measurements were made on the slope, the vertical angles of each interval determined by clinometers in good adjustment and distances reduced to true horizontal which alone appear in the field notes.

The data furnished with the special instructions gives the geographic position of the SE. cor. of T. 11 N., R. 17 E., as $34^{\circ}17'50''$ N., and longitude $110^{\circ}28'54''$ W.

Sept. 10, 1935, in camp near the center of sec. 19, T. 11 N., R. 18 E., G. & S.R., Mer., in latitude $34^{\circ}20'N.$, and longitude $110^{\circ}28'54''W.$, at 8h 27.5m l.m.t., observe Polaris at eastern elongation, making four observations, two each with the telescope in direct and reversed positions, and mark the mean point in the line thus determined, by a peg in the ground, 8 chs. N.

Azimuth of Polaris at eastern elongation----- $1^{\circ}16'$

Sept. 11: I lay off the azimuth of Polaris $1^{\circ}16'$ to the west, and mark the meridian thus determined by a nail in a peg, 8 chs. N.

Test of Buff 18002.

Sept. 11; at my station in camp heretofore described, I examine the adjustment of the instrument and correct all errors. Then test the solar apparatus by comparing its indications hourly with the true meridian established by Polaris observation.

At 9h a.m., app.t. I set off $34^{\circ}20'N.$, on the lat. arc; $4^{\circ}45.5'N.$, on the decl. arc; and determine a meridian with the solar, which I find to agree with the true meridian.

At app. noon, with the latitude arc unchanged, I observe the sun on the meridian; the resulting reading of the decl. arc is $4^{\circ}42.5'N.$, which agrees with the computed declination of the sun.

At 3h Qm p.m., app. t., with the lat. arc unchanged, I set off $4^{\circ}40.5'N.$, on the decl. arc; and again determine a meridian which agrees with the true meridian.

As all of the solar observations during the usual hours of solar work come within 1' of the true meridian, I conclude that the instrument is in satisfactory adjustment.

Test of Y. & S. No. 6808..

Sept. 15, at my station in camp previously described, I examine the adjustments of the instrument and correct all the errors, then test the solar by comparison with the true meridian.

At 8h 30m a.m., app. t., with the lat. arc. set at $34^{\circ}20'N.$, and decl. arc at $3^{\circ}14.5'N.$, determine a meridian with the solar which agrees with the true meridian.

Resurvey of the W; Bdy. of T. 11 N., R. 18 E.

Chains At 12h noon, app. t., with decl. arc set at $3^{\circ}10.5'N.$, I observe the sun on the meridian and note the resulting latitude reading to be $34^{\circ}19'40"N.$. At 4h 0m p.m., app. t., with lat. arc unchanged, I set the decl. arc at $3^{\circ}07.5'N.$, and again observe the sun and find no divergence from the true meridian. The adjustments of the instrument are satisfactory.

Test of Gurley 20120.

Sept. 20, 1935, at camp near the $\frac{1}{2}$ sec. cor., bet. secs. 21 and 22, T. 11 N., R. 17 E., at 7h 48.3m p.m., l.m.t., observe Polaris at eastern elongation, making four observations, two each with telescope in direct and reversed positions, and mark the mean point thus obtained by a flag 15 chs. N.

Azimuth of Polaris at elongation is $1^{\circ}15'$.

Sept. 22, after laying off the azimuth of Polaris $1^{\circ}15'$ to the west and establishing a point from which to check the true meridian thus established, every thirty minutes during the period for solar work, I make proper settings on the arcs of the solar attachment and ascertain the resulting orientation of the instrument when compared with the true meridian. The maximum error is less than $1'30''$ and the instrument proved to be in satisfactory adjustment.

History of earlier surveys.

The west boundary of T. 11 N., R. 18 E., was established by H.A.Coe, Deputy Surveyor in 1883. In 1915 the W. bdy. of secs. 19, 30 and 31 were resurveyed by U.S. Surveyor Blout.

The Indian Reservation boundary in secs. 34, 35 and 36, originally surveyed, and resurveyed in 1906 by J.B.Wright, as the N. bdy. of the White Mountain has become the N. bdy. of the Fort Apache Indian Reservation.

In 1916, the U.S. Forest Service reconstructed the cor. of Tps. 11 and 12 N., Rs. 17 and 18 E.

No other work on the boundary lines is of record.

From the cor. of secs. 25, 30, 31 and 36, on the W. bdy. of T. 11 N., R. 18 E.,

40.14	North, on a random line on the W. bdy. of T. 11 N., R. 18 E.
80.26	A point 25 lks. E. of the $\frac{1}{2}$ sec. cor. of secs. 25 and 30.
120.27	A point 21 lks. E. of the cor. of secs. 19, 24, 25 and 30.
160.59	A point 24 lks. E. of the $\frac{1}{2}$ sec. cor. of secs. 19 and 24.
201.22	A point 68 lks. E. of the cor. of secs. 13, 18, 19 and 24.
241.90	A point 37 lks. E. of the $\frac{1}{2}$ sec. cor. of secs. 13 and 18.
282.29	A point 51 lks. W. of the cor. of secs. 7, 12, 13 and 18.
322.90	A point 215 lks. W. of the $\frac{1}{2}$ sec. cor. of secs. 7 and 12.
363.37	A point 174 lks. W. of the cor. of secs. 1, 6, 7 and 12.
405.16	A point 156 lks. W. of the $\frac{1}{2}$ sec. cor. of secs. 1 and 6.
	A point 69 lks. W. of the cor. of Tps. 11 and 12 N., Rs. 17 and 18 E.

Return to the cor. of secs. 25, 30, 31 and 36, an iron post, 3 ins. diam., set, mkd. and witnessed as described in the official record.

CERTIFICATE OF UNITED STATES SURVEYOR

We, Albinus N.Kimmell, U.S.Cadastral Engineer; Charles E.Hunter,
U.S.Transitman and Bert E.Wakeman, Public Land Surveyor

HEREBY CERTIFY upon honor that, in
pursuance of special instructions bearing date of the 18th day of June 1934,
received from the district cadastral engineer for Arizona, with assignment
August 22, and Sept. 12, 1935,
instructions dated we have surveyed the South, West and North
Boundaries and re-surveyed part of the E. Bdy. of T.11 N., R.17 E.,

of the G. & S.R. Meridian, in the State of Arizona, which are
represented in the foregoing field notes as having been executed by us and under our direction; and that said
and resurvey survey has been made in strict conformity with said instructions, the Manual of Instructions for the Survey

of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.
Glendale, California, Jan. 30, 1936 Albinus N.Kimmell U.S.Cadastral Engineer

Glendale, California, Jan. 30, 1936 Charles E.Hunter U.S.Transitman

Phoenix, Arizona, Feb. 3, 1936 Bert E.Wakeman Public Land Surveyor

CERTIFICATE OF APPROVAL

OFFICE OF U.S. SUPERVISOR OF SURVEYS,

Denver, Colorado, Nov. 17, 1936.

The foregoing field notes of the survey of the South, West and North boundaries,
and the resurvey of a part of the East boundary of Township 11 North,
Range 17 East, of the Gila and Salt River Meridian, in the State of
Arizona

Albinus N.Kimmell, U.S.Cadastral Engineer, Charles E.Hunter,
executed by U.S.Transitman and Bert E.Wakeman, Public Land Surveyor

under special instructions dated June 18, 1934, and assignment
instructions dated Aug. 22 and Sept. 12, 1935, having been critically examined, and
the necessary corrections made prior to their certification by the engineer, the said field notes, and the survey
and resurvey
therein described, are hereby approved.

U.S. Supervisor of Surveys.

CERTIFICATE OF TRANSCRIPT

I certify that the foregoing transcript of the field notes of the above described surveys in
is a true copy of the original field notes on file in the public survey office.

U.S. Supervisor of Surveys.
