# FIELD NOTES

OF THE SURVEY OF THE

SUBDIVISIONAL LINES

OF

TOWNSHIP 11 NORTH, RANGE 17 EAST

and

RETRACEMENT OF A PORTION OF THE NORTH BOUNDARY OF  
FORT APACHE INDIAN RESERVATION IN SAID TOWNSHIP

Of the GILA & SALT RIVER Meridian,

ARIZONA

In the State of

EXECUTED BY

Albinus N. Kimmell, U.S. Cadastral Engineer,

Charles E. Hunter, U.S. Transitman, and

Bert E. Wakeman, Public Land Surveyor

In the capacity of U. S. Surveyor S, under Special Instructions dated June 18, 1934, issued by the District Cadastral Engineer to govern surveys included in Group No. 191, which were approved by the Commissioner of the General Land Office, July 6, 1934, and Assignment Instructions dated Sept. 12, 1935 August 22 and

Survey commenced September 25, 1935

Survey completed November 3, 1935

## Subdivision of T. 11 N., R. 17 E.

4104

## Chains

The subdivisional survey of township 11 north, range 17 east, was executed with Buff solar transit No. 18002, Young and Sons solar compass No. 6808; and Gurley solar transit No. 20120; all constructed in accordance with the standard specifications of the General Land Office. For instrument tests, see the field notes of the survey of the boundaries of this township. During the progress of the survey, the instruments were examined and tested frequently on a true meridian determined by Polaris observation and kept free of appreciable error at all times.

The directions of the subdivisional lines were determined by the solar. The measurements were made with Lallie 5 chain steel tapes, graduated every link for the first hundred lks. and the balance at intervals of 10 lks. The tapes were tested by comparison with a Lufkin standard and found correct. The measurements were made on the slope, and the vertical angle of each interval was ascertained by a clinometer in good adjustment; the horizontal equivalents are entered in the field note record.

The east boundary of the township being defective in part both in alignment and measurement and new corners being established along the boundary for the sections to the west, a governing section line parallel to the mean bearing of the east boundary was run, with the longitudinal lines run as random and true between the corners relating to T. 11 N., R. 17 E.

As the N. bdry. of the Fort Apache Indian Reservation traverses through secs. 34, 35, and 36, closing corners were established on the meridional section lines at the intersection with the Reservation boundary. These section lines were initiated at corners on the S. bdy. and run regularly.

All sections against the N. bdy. of the township are elongated and lot corners were established in accordance with Manual rules.

Forest Reserve H.E.S. No. 186 in secs. 21 and 28, No. 195 in secs. 2 and 11, No. 452 partially in secs. 1 and 2, and No. 246 partially in secs. 3 and 4, were located in accordance with the Special Instructions for Group 191.

I commence the subdivisional survey at the cor. of secs. 1, 2, 35 and 36, on the S. bdy. of the Tp., described in the field notes of the exteriors of T. 11 N., R. 12 E., surveyed and resurveyed under this group. X  
N. 0°02'E., on a governing section line bet. secs. 35 and 36, in the Fort Apache Indian Reservation.

Over mountainous land, through heavy timber and dense undergrowth, Ascend 5 ft. over SW. slope.

- |       |  |
|-------|--|
| 1.50  | Top of ascent, descend 25 ft. over NW. slope           |
| 5.10  | Ravine, course S.15°W., ascend 60 ft.                  |
| 9.50  | Point of spur slopes SE., descend 9 ft.                |
| 12.10 | Head of same ravine, course S.40°E., ascend 15 ft.     |
| 15.96 | U.S.F.S. boundary fence, bears N.84°E., and S.84°W.    |
| 16.25 | Intersect the N. bdy. of the reservation.              |
|       | Set an iron post, 3 ft. long, 2 ins. diam., 32 ins. in |

## Final Test of Instruments..

Gurley Solar Transit No.  
20120.

October 13; at camp near the  $\frac{1}{4}$  sec. cor., bet. secs. 21 and 22, at 9h 0m a.m., app. t., with the lat. arc set at  $34^{\circ}20'N.$ ; decl. arc at  $7^{\circ}34'19"S.$ , orient the instrument with the solar; the line of sight agrees with the meridian established by Polaris observation.

At 3h 0m p.m., app.t., with lat. arc set at  $34^{\circ}20'N.$ , and decl. arc set at  $7^{\circ}40'S.$ ; repeat the test of the solar; the line of sight agrees with the meridian established by Polaris observation.

## Buff Solar Transit No. 18002.

At camp near the center of sec. 19, T. 11 N., R. 18 E., November 3, 1935; at 9h 30m a.m., app.t., with the lat. arc set at  $34^{\circ}20'N.$ , and the decl. arc at  $14^{\circ}54'S.$ , orient the instrument with the solar; the line of sight agrees with the true meridian.

At 2h 30m p.m., app.t., with the lat. arc unchanged, set the decl. arc at  $14^{\circ}58'17"S.$ , repeat the test of the solar; the line of sight agrees with the true meridian.

## Test of Y. &amp; S. 6808.

November 3, 1935; at 9h 35m a.m., app.t., set lat. arc at  $34^{\circ}20'N.$ , decl. arc at  $14^{\circ}54'S.$ , and determine a meridian with the solar which agrees with the meridian established by Polaris observation.

At 2h.35m p.m., app. t., with the lat. arc unchanged, set the decl. arc at  $14^{\circ}58'17"S.$ , repeat the test. The meridian thus determined again agrees with the true meridian.

## General Description.

A considerable of variety in the land and soil exists in T. 11 N., R. 17 E., varying from fairly rough mountainous to rolling uplands and valleys. The general elevation is about 6500 to 7500 ft. above sea level, with the high elevations occurring along the Mogollon ridge traversing along through the township near the S. bdy. and thence sloping to the NE. in a series of ridges. The soil on the ridges and through the south part of the township is a heavy clay with considerable stone, while the ravine beds and lower levels generally have a mixture of sand and silt. There is considerable good yellow pine timber scattered

throughout the township. Also much juniper and oak, but this not of great commercial value. Some cottonwood stands along the principal washes.

Water is scarce and only to be secured in wells along the beds of the washes and then is pretty hard. There is no running water except during the spring season or after heavy rains. In a few places water stands in small pools in the beds of Decker, Phoenix Park and Buckskin Washes.

No important developments have taken place, and there are but two cultivated tracts in the township. In secs. 1 and 2, there is one resident. Phoenix Park also known as the Holcomb ranch lies in secs. 21 and 28, and is a natural open park that has been cultivated for many years. Corn, grain and hardy vegetables grow to maturity and good crops have been raised in wet seasons.

The land is generally covered with good grass and is adapted to grazing.

There are a number of pre-historic ruins of stone houses scattered over the ridges through the eastern half of the township and attention has been called in the field notes to those that were known.

No mineral deposits were noted or known to exist.

Roads and truck trails are numerous throughout the township and a Forest Service telephone line crosses through sections 1 and 2.

There are no towns nearer than Holbrook, Arizona, though post offices are maintained at Aripine, in T. 12 N., R. 18 E., and in T. 12 N., R. 16 E. at Heber, where there is also a store and small settlement.

## CERTIFICATE OF UNITED STATES SURVEYOR

We, Albinus N. Kimmell, U.S.Cadastral Engineer; Charles E. Hunter, U.S.Transitman and Bert E.Wakeman, Public Land Surveyor

I, \_\_\_\_\_, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 18th day of June 1934, received from the district cadastral engineer for Arizona, with assignment August 22, and Sept. 12, 1935, instructions dated / we have surveyed the Subdivision Lines of T. 11 N., R. 17 E., and retraced a portion of the North boundary of the Fort Apache Indian Reservation in said township

of the G. & S.R. Meridian, in the State of Arizona, which are us our represented in the foregoing field notes as having been executed by ~~ME~~ and under ~~my~~ direction; and that said survey has been made in strict conformity with said instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.

Glendale, Calif. Jan. 30, 1936.

*Albinus N. Kimmell* U.S.Cadastral Engineer

*Charles E. Hunter* U.S.Transitman

Phoenix, Arizona, Feb. 3, 1936

*Bert E. Wakeman* Public Land Surveyor

## CERTIFICATE OF APPROVAL

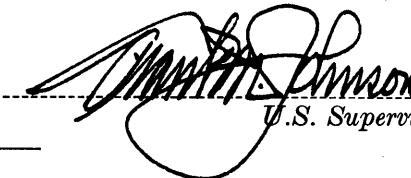

OFFICE OF U.S. SUPERVISOR OF SURVEYS,

Denver, Colorado, Nov. 17, 1936.

The foregoing field notes of the survey of the subdivisional lines of Township 11 North, Range 17 East, and retraced a portion of the North boundary of the Fort Apache Indian Reservation in said township, of the Gila and Salt River Meridian, in the State of Arizona,

Albinus N. Kimmell, U.S.Cadastral Engineer, Charles E. Hunter, executed by J.S. Transitman and Bert E.Wakeman, Public Land Surveyor,

under special instructions dated June 18, 1934, and assignment instructions dated Aug. 22 and Sept. 12, 1935, having been critically examined, and the necessary corrections made prior to their certification by the engineer, the said field notes, and the survey and retracement therein described, are hereby approved.

*U.S. Supervisor of Surveys.*

## CERTIFICATE OF TRANSCRIPT

I certify that the foregoing transcript of the field notes of the above-described surveys in \_\_\_\_\_, is a true copy of the original field notes on file in the public survey office.

*U.S. Supervisor of Surveys*
