# FIELD NOTES

OF THE SURVEY OF THE

North and West boundaries

and

Subdivisional lines

of

Fractional Township 10 North, Range 16 East,

Of the Gila and Salt River Meridian,

In the State of Arizona

## EXECUTED BY

Charles E. Hunter, U.S. Transitman

In the capacity of U. S. Surveyor, under Special Instructions dated June 18, 1934, issued by the District Cadastral Engineer to govern surveys included in Group No. 191, which were approved by the Commissioner of the General Land Office, July 6, 1934, and Assignment Instructions dated August 22, 1935.

Survey commenced October 5, 1935.

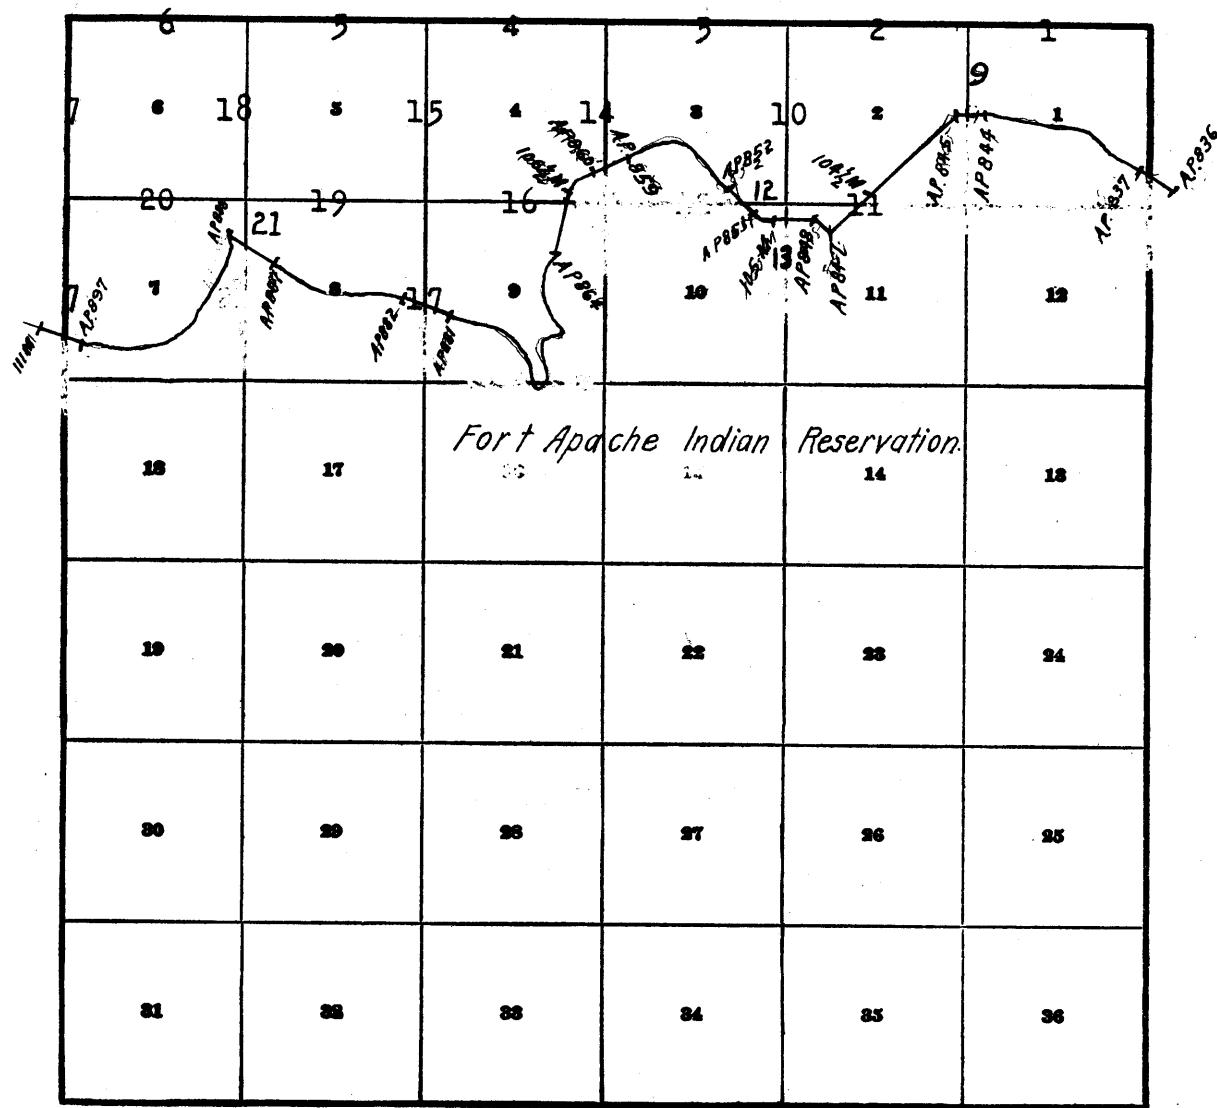

Survey completed October 26, 1935.

## Final test of instrument

October 27, 1935

At station, approximately  $1\frac{1}{2}$  miles north of the  $\frac{1}{4}$  section corner of sections 4 and 33, Tps. 10 and 11 N., R. 16 E., approximate latitude  $34^{\circ} 19' N.$ , and longitude  $110^{\circ} 39' W.$  at 9h 18m 40s a.m., l.m.t., I observe Polaris at western elongation, making two sights, each with the telescope in the direct and the reverse position, and mark the mean point in the line thus determined, by a tack in a peg driven firmly in the ground, 8 chs. north. After sunrise I lay off the azimuth of Polaris  $1^{\circ} 15' 29''$  and make a meridian mark on a second peg, 17.57' lks. to the east of the mean point in the line determined by the observation. I verify the angle by a vernier reading of the instrument.

At 9h 00m a.m., app.t., with  $34^{\circ} 19' N.$ , set off on the latitude arc, and  $12^{\circ} 36' S.$ , set off on the declination arc, the instrument is oriented with the solar; the solar meridian thus obtained agrees within  $1\frac{1}{2}'$  of the true meridian.

At apparent noon, with the latitude arc unchanged, the sun is observed on the meridian; the resulting reading of the declination arc is  $12^{\circ} 39' S.$ , which agrees with the com-

## Subdivision of frac. T. 10 N., R. 16 E.

## Chains

puted declination of the sun.

At 3h 00m p.m., app.t., with the latitude arc unchanged, and  $12^{\circ} 41'$  S. set off on the declination arc, the instrument is oriented with the solar; the solar meridian thus obtained again agrees within  $1\frac{1}{2}'$  of the true meridian.

As all of the solar observations taken during the usual hours of solar work, agree within  $1\frac{1}{2}'$  of the true meridian it is concluded that the solar has maintained its adjustment.

## General description

Fractional T. 10 N., R. 16 E., is situated on the Mogollon Plateau, about fifty miles southwest of Holbrook, Arizona. It may be reached by roads leading from either Holbrook or Young. A second class road enters the township on the east boundary of section 1, follows close to the divide, and leaves the township on the west boundary of section 6. Grading operations on this road were progressing through sections 5 and 6 at the time of this survey.

The elevation of the township ranges from 7,000 to 7,500 feet above sea level. The divide follows very close to the north boundary, most of the drainage being to the south. The soil is generally a sandy and gravelly loam containing much rock. A good growth of timber is found over the entire fractional township. Yellow pine predominates, while white fir, oak, aspen and juniper are found in more scattered growths. The undergrowth is scattering and there is only a thin stand of native grass. The only running water is in section 1.

## CERTIFICATE OF UNITED STATES SURVEYOR

I, Charles E. Hunter, U.S. Transitman, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 18th day of June 1934, received from the district cadastral engineer for Arizona, with assignment instructions dated August 22, 1935, I have surveyed the North and West boundaries and subdivisional lines of fractional Township 10 North, Range 16 East,

River  
of the Gila and Salt Meridian, in the State of Arizona, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.

Glendale, California,

February 24, 1936.

*Charles E. Hunter*

U. S. Transitman

## CERTIFICATE OF APPROVAL

OFFICE OF U.S. SUPERVISOR OF SURVEYS,

Denver, Colorado, Nov. 17, 1936

The foregoing field notes of the survey of the North and West boundaries and subdivisional lines of fractional Township 10 North, Range 16 East, of the Gila and Salt River Meridian, in the State of Arizona,

executed by Charles E. Hunter, U.S. Transitman, under special instructions dated June 18, 1934, and assignment instructions dated August 22, 1935, having been critically examined, and the necessary corrections made prior to their certification by the engineer, the said field notes, and the survey therein described, are hereby approved.

*Franklin Johnson*

U.S. Supervisor of Surveys.

## CERTIFICATE OF TRANSCRIPT

I CERTIFY that the foregoing transcript of the field notes of the above-described surveys in \_\_\_\_\_, is a true copy of the original field notes on file in the public survey office.

*U.S. Supervisor of Surveys*
