# FIELD NOTES

OF THE SURVEY OF THE

North and West Boundaries, and Subdivisional Lines of

Township 11 North, Range 16 East,

Of the Gila and Salt River Meridian,

In the State of Arizona

## EXECUTED BY

Horace M. Muscott,

Public Land Surveyor

Thornton Fitzhugh

Transitman (PW)

Under special instructions dated June 18, 1934, which provided for the surveys included under Group No. 191, bearing the approval of the Commissioner of the General Land Office under date of July 6, 1934, and assignment instructions dated August 24 and Sept. 1, 1936.

Survey commenced August 30, 1936

Survey completed October 24, 1936

BCCX 4114

## **INDEX DIAGRAM.**

## West Boundary of T. 11 N., R. 16 E.

1B

BOOK 4114

The survey was executed with a light mountain solar transit made by Buff & Buff, Serial No. 16723, and Young & Sons solar transit Serial No. 8385, constructed in accordance with the standard specifications of the General Land Office. The horizontal circle of Buff & Buff transit has a diameter of  $4\frac{1}{2}$  ins., with two double opposite verniers reading to single minutes; the vertical circle has a diameter of 4 ins., with one double vernier reading to single minutes; the telescope has fixed stadia wires, ratio 1:132 with a focal constant of 1.2 lks. The instrument is equipped with the improved Smith solar attachment; radius of latitude arc  $2\frac{1}{2}$  ins., and of the declination arc  $3\frac{1}{2}$  ins., each with verniers reading to single minutes. The horizontal circle of Young & Sons transit has a diameter of  $5\frac{1}{2}$  ins., with two double opposite verniers reading to single minutes; the vertical circle has a diameter of  $4\frac{1}{2}$  ins., with one double vernier reading to single minutes; the telescope has fixed stadia wires, ratio 1:132 with a focal constant of 1.2 lks. The instrument is equipped with the improved Smith solar attachment; radius of latitude arc  $3\frac{1}{2}$  ins., and of the declination arc  $37/8$  ins., each with verniers reading to single minutes. The instruments were in good condition, and having been placed in satisfactory adjustment prior to beginning the survey and tested and found free from appreciable error, were approved by the district cadastral engineer on August 24, 1936, respectively. We examine all the instrumental adjustments before making the field tests hereinafter recorded.

The measurements were made with Lallie steel tapes 5 chs. in length, graduated every link for the first 100 lks. and the balance at intervals of 10 lks. The tapes were tested by comparison with a Lufkin standard and found correct. The measurements were made on the slope and the vertical angles of each interval was ascertained by a clinometer in good adjustment; the horizontal equivalents are entered in the field note record.

The data furnished with the special instructions gives the geographic position for the SE. cor. of T. 11 N., R. 17 E., as follows: latitude  $34^{\circ}17'50''$  N., and longitude  $110^{\circ}28'54''$  W.

August 29, 1936, in camp near the cor. of secs. 7, 12, 13 and 18, Ts. 11 N., Rs. 16 and 17 E., with Buff & Buff transit No. 16723, at 9h 11.6m p.m., l.m.t., or 9h 33m 57m p.m., by my watch, which reads correct 105th meridian time as determined by Western Union clock, I observe Polaris at eastern elongation, making two sights each with the telescope in direct and reversed positions and place a nail at the mean point, driven firmly in a dead log 5 chs. N.

August 30, 1936, in order to verify the latitude of this station in approximate latitude  $34^{\circ} 21' 18''$  N., and longitude  $110^{\circ} 35' 20''$  W., I make an altitude observation on Polaris at upper culmination for latitude, making four observations, two each with the telescope in direct and reversed positions.

Mean observed vertical angle	$35^{\circ} 24' 30''$
Mean watch time of observation a.m.	3h 30m 19s
Watch fast of 105th meridian standard time	22m. 21s
Reduced Latitude	$34^{\circ} 20' 43''$

After sunrise, I lay off the azimuth of Polaris,  $1^{\circ} 15' 35''$ , and make a meridian mark on a second nail, to the west of the mean point in the line determined by the observation.

2 BOOK 4114

West Boundary of T. 11 N., R. 16 E.

Every 30 min. from 8 to 10.30 a.m. and from 1.30 to 4 p.m., we make proper settings on the arcs of the solar attachments and ascertain that the resulting orientation of the instruments, when compared with the meridian established by Polaris observation, has a maximum error of less than 1' 30".

We repeat the tests of the arcs daily by noon observation, and verify the meridional indications at frequent intervals throughout the survey.

The observed magnetic declination is 14° 30' E.

The east and south boundaries of T. 11 N., R. 16 E., were originally surveyed in 1935, under this group.

Beginning at the cor. of Tps. 10 and 11 N., R. 16 E., which is an iron post 3 ins. diam., 9 ins. above ground, firmly set, marked and witnessed as described in the field notes of the boundary of T. 10 N., R. 16 E., surveyed under this group.

North, along the W. bdy. of sec. 31.

Over rolling land, through scattered timber and undergrowth.

Desc. 150 ft. along W. slope.

15.30 Continue descending 86 ft. over N. slope.

34.20 Continue descending 35 ft. along E. slope of spur.

40.00 Set an iron post, 3 ft. long, 1 in. diam., 27 ins. in the ground, for  $\frac{1}{4}$  sec. cor. of sec. 31 only, with brass cap mkd.

Oct. 24, 1936.

## General Description.

The land embraced in Township 11 North, Range 16 East, is for the most part rocky clay on the rolling lands, sandy loam in the valleys, and rocky on ridges and spurs. The eastern half is rolling to level, while the western half is rolling mountainous. The general elevation is about 6800 to 7000 ft. above sea level. The entire township has a heavy stand of yellow pine with a scattering of spruce, fir and aspen in the southwestern portion. In the northwestern portion quite a few junipers are found, and mountain cottonwood occurs along stream beds and large washes. Second growth pine, and some juniper, comprise most of the undergrowth within the township.

Water is scarce over most of the township, there being only a few springs and short running streams. There are a number of homestead entries in the occasional valleys where water is available, mostly from wells. There are no mines, quarries, sawmills or other industries within the township. Cattle and some sheep, are allowed to graze during the summer months, there being only a moderate amount of grasses other than in the meadow lands under homestead entry.

The average of a considerable number of readings over all parts of the township give a value of  $14^{\circ} 30'$  E. for the mean magnetic variation.

CERTIFICATE OF UNITED STATES SURVEYOR

Cr. 191

We, Horace M. Muscott, Public Land Surveyor and Thornton Fitzhugh, Transitman (P.W.) hereby certify upon honor that, in pursuance of special instructions bearing date of the 18th day of June, 1934 received from the district cadastral engineer for Arizona, with assignment 1936, instructions dated Aug. 24 and Sept. 1, we have surveyed the North and West boundaries and the subdivisional lines of Township 11 North, Range 16 East,

River Meridian of the Gila and Salt Meridian, in the State of Arizona, which are represented in the foregoing field notes as having been executed by us and under our direction; and that said survey has been made in strict conformity with said instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.

Glendale, Calif., February 18, 1937.

Phoenix, Ariz., February 20, 1937

*Horace M. Muscott*  
Public Land Surveyor  
*Thornton Fitzhugh*  
Transitman (P.W.)

CERTIFICATE OF APPROVAL

OFFICE OF U.S. SUPERVISOR OF SURVEYS,

Denver, Colorado, July 6, 1937.

The foregoing field notes of the survey of the North and West boundaries and the subdivisional lines of Township 11 North, Range 16 East, of the Gila and Salt River Meridian, in the State of Arizona,

executed by Horace M. Muscott, Public Land Surveyor and Thornton Fitzhugh, Transitman (P.W.) under special instructions dated June 18, 1934, and assignment instructions dated Aug. 24 and Sept. 1, 1936, having been critically examined, and the necessary corrections made prior to their certification by the engineer, the said field notes, and the survey therein described, are hereby approved.

*James H. Johnson*  
U.S. Supervisor of Surveys.

CERTIFICATE OF TRANSCRIPT

I certify that the foregoing transcript of the field notes of the above described surveys in \_\_\_\_\_, is a true copy of the original field notes on file in the public survey office.

*U.S. Supervisor of Surveys*
