of the RE-SURVEY and SURVEY of
the G.& S.R. MERIDIAN thru FRAC. T. 42 N.
and
of the SURVEY of the
·
SUBDIVISION LINES
o f
FRACTIONAL TOWNSHIP 42 NORTH, RANGE L EAST
Of the Gila and Salt River Base and Meridian,
In the State ofArizona
EXECUTED BY
Bert E. Wakeman, U. S. Transitman
Under special instructions dated July 30 , 19 36, which provided
for the surveys included under Group No. 207, bearing the approval of the
Commissioner of the General Land Office under date of August 12, 1936
and assignment instructions dated August 12 , 1936
Survey commenced September 24 , 19 36
Survey completed September 30 , 19 36

FINAL TEST OF INSTRUMENT

Oct. 4, 1936; At camp in sec. 2, T.41 N., R.3 E., at 9h. Om a.m. app. t., set off 36° 59' N. on the lat. arc, 4° 26' S. on the decl arc and orient the instrument with the solar; the line of sight agrees with the meridian determined by Polaris observation.

At 3h 0m p.m. app. t., with the lat. arc unchanged, set off 4° 31 3/4' S. on the decl. arc. and repeat the test of the solar; the line of sight agrees with the meridian determined by Polaris observation.

GENERAL DESCRIPTION

This fractional township adjoining the Utah-Arizona State Bdy. line, is rolling and mountainous, draining in general to the south, into the Johnson Wash, which drains southwesterly into Kanab Creek.

The elevation is about 5000 ft. above sea level.

The soil is course sand and rocky clay, 3rd and 4th rate. The larger portions of sections 32 and 33 lie on a rough, broken southeasterly slope, designated in the field notes as Bad Lands, consisting of a series of spurs, caused by erosion, averaging from 20 to 60 ft. high and with precipitous slopes. These Bad Lands are of a clay formation, nearly devoid of vegetation.

There is very little timber in the east half of the township, the west half is covered by a heavy growth of juniper and pinon timber which has no commercial value for building purposes, but can be used for fence posts and fuel. There is a heavy growth of sage and grass covering all of the township, affording good stock grazing.

There is no running water, though a spring known as Johnson Spring, which is noted in the SE. corner of section 31, which is the water supply for a sheep shearing plant, located south of the S. bdy. of section 31.

There are no settlers or ranch improvements noted within the township.

Several roads traverse the township, but none are main traveled roads between settlements.

The nearest post-office in Arizona is Fredonia, which is about 12 miles southwesterly, and the nearest post-office in Utah is Kanab, about the same distance north-westerly.

The adjoining Utah townships are Frac. T. 44 S., R's. 4 and $4\frac{1}{2}$ W., Salt Lake Base and Meridian, Utah.

There is no indication of valuable mineral deposits within the township.
