Township 4 South, Range 3 East, G. & S.R. Mer.

Resurvey of the South Boundary of T. 4 S., R. 3 E.

CHAINS

The surveys in this township were executed with light-mountain solar Transit made by Buff & Buff Manufacturing Co., Serial No. 10125.

For further description of the instrument, test of same and other preliminary facts, see the field notes of the Subdivision of Sections in T.5 S., R.4 E., surveyed under this group.

The data furnished with the special instructions gives the geographic position for the SE. cor. of T.4 S., R.3 E., as follows: Latitude $33^{\circ}01.6'N.$, and longitude $111^{\circ}59'50"W.$

This township was originally surveyed by G.P. Ingalls, D.S., in 1868. The north one-third was independently resurveyed by R.A. Farmer, in 1912. There is no other re-tracement or resurvey of any portion of the township, of record.

The following notes describe a dependent resurvey of the S. Bdy., the S. 4 miles of the W. Bdy., the lines of sections 18, 19, 29 and 33. These sections are then subdivided in accordance with the general provisions of the Manual. All one-sixteenth corners that constitute angle points of the Maricopa Indian Reservation Boundary are established and marked as one-sixteenth corners.

Preliminary to the resurveys, the necessary lines of the original survey are retraced and diligent search is made for the original corners. Necessary missing corners are then reestablished at proportional positions. The retrace-ment data is thoroughly verified and to gain simplification only the true line field notes are recorded herein.

The cor. of Ts. 4 and 5 S., Rs. 3 and 4 E., is an iron post, 3 ins. diam., 3 ins. above ground, firmly set and marked as described in the official record.

From this cor., the new reference objects:

The SE. cor. of a power plant rig bears $N.50^{\circ}W.$, 104 lks. dist.

Cor. of fences bears S. and E., bears $S.46\frac{1}{2}^{\circ}E.$, 59 lks. dist.

Power pole bears $S.18^{\circ}W.$, 135 lks. dist.

Cor. of fences bearing N. and W., bears west, 46 lks. dist.

Cor. is set in center of crossroads, bearing N., S., E. and W.; the land to NW. of cor. is cultivated.

GENERAL DESCRIPTION

The land in the resurveyed portion of this township is
level, cut by occasional washes, which drain northeasterly.
The soil is a light clayloam, generally 1st rate, with oc-
casional sandy stretches, 2d rate; The timber is mesquite,
scattering in most portions, with occasional heavy thickets.
The undergrowth is sage, greasewood and mesquite. With
the exception of the graded highway, which bears parallel
to the R.R., all the roads are unimproved and bear mostly
NE. to Maricopa and SW. to the Indian village in secs. 31
and 32. The Southern Pacific Railroad bears NW. to Gila
Bend, and SE., thru Maricopa, to Casa Grande.

The Indian Service has dug 3 good wells and installed
electric well pumps along the S. bdy. of sec. 32.
