	Undergrowth, scattering greasewood.			

FOOK 4444

Subdivision of T. 7 N., R. 19 W.

#### General Description

Township 7 North, Range 19 West lies on the La Posa Plain adjacent to the Colorado River Indian Reservation. The east boundary of the Reservation angles across the north three sections of the west tier. The land is all rolling with elevations from 700 ft. to 900 ft. above sea level. Drainage is in a generally north direction. The soil is all sandy and supports a scattering growth of greasewood undergrowth over most of the township.

There are no traveled roads or improvements within the township.
