FIELD NOTES

of

The Survey of

a Portion of the Subdivision of

Township 3 North, Range 20 West

Of the Gila and Salt River Meridian,

In the State of Arizona.

EXECUTED BY

Donald E. Harding

Fred R. Chappell

Under special instructions dated November 27, 1950, which provided
for the surveys included under Group No. 273, approved Jan. 16, 1951
and assignment instructions dated Jan. 25, 1954

Survey commenced Mar. 12, 1954

Survey completed Mar. 26, 1954

Lines surveyed by Donald E. Harding _____
Lines surveyed by Fred R. Chappell _____

16-56770-1

Partial Subdivision of T. 3 N., R. 20 W.

Chains

The south boundary of T. 3 N., R. 20 W. was surveyed by Ty White in 1952.
 The east boundary was surveyed by Abbey and Gill in 1915.
 Provisions were made for the survey of the north boundary under Group 254, Arizona.
 The notes of the west boundary are contained in the notes of the T. 3 N., R. 21 W.
 The survey was executed at the request of Mr. O. C. Williams, Arizona State Land Commissioner.
 The survey was executed with a light mountain solar transit made by Buff and Buff, Serial No. 16724, constructed in accordance with standard instrumental specifications of the Bureau of Land Management. Horizontal circle is $4\frac{1}{2}$ inches in diameter with two double opposite verniers reading to single minutes. Vertical circle is 4 inches in diameter with one double vernier reading to single minutes. The instrument is equipped with an improved telescopic solar attachment, radii of latitude are 3 inches and of declination are $3\frac{1}{2}$ inches with vernier reading to single minutes. Instrument was in good condition and was placed in proper adjustment prior to the beginning of the survey.
 The direction of all lines was determined by the direct solar method and the measurements made by a Lufkin steel tape, 5 chains in length, graduated every one tenth link for the first 10 links, every link for the next 90 links, and every 10 links for the balance. The tape was tested by comparison with a standard tape and found correct. Measurements were made on the slope, and the vertical angle of each interval was ascertained by a clinometer in good adjustment. The horizontal equivalents only are entered in this field note record.
 The camp meridian, for testing the transit, was established from the azimuth of a C. & G. S. triangulation station.
 The transit was checked from time to time on the meridian and the azimuth of the lines was checked by direct solar method as the survey progressed. The latitude of the SE. cor. of the township is $33^{\circ}32'59''N.$; longitude is $114^{\circ}16'08''W.$ Magnetic declination is $14^{\circ}E.$

Beginning the partial subdivisional survey of T. 3 N., R. 20 W., at the cor. of secs. 1, 2, 35, and 36, on the S. bdy. of the T. N. $0^{\circ} 01' W.$, bet. secs. 35 and 36.
 Over rocky land with scattered brush.

10.55 Wash, 8 lks. wide, 2 ft. deep, course E.

40.00 Point for the $\frac{1}{4}$ sec. cor. of secs. 35 and 36.
 Set an iron post, 28 ins. long, $2\frac{1}{2}$ ins. diam., 24 ins. in the ground, with brass cap mkd.

	Land, mountainous and rocky.
	Soil, rocky loam.
	Timber, none; underbrush, greasewood, and cacti.

General Description

The east half of T. 3 N., R. 20 W., is mostly gravel covered benches and washes with some high rocky ridges and mountains. Grass is very sparse and there are some scattered paloverde trees along the washes. The main vegetation is cacti and greasewood. There is no water. In the early days there was some mining activity, however, that has been abandoned. The soil is very poor.

CERTIFICATE OF CADASTRAL ENGINEER

I, We, Donald E. Harding and Fred R. Chappell, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 27 th. day of November, 1950
 We have surveyed the East $\frac{1}{2}$ of T. 3 N., R. 20 W.

of the Gila & Salt River Meridian, in the State of Arizona, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.
