# Metes and Bounds Survey Section 6, Township 23 South, Range 24 East Gila and Salt River Meridian, Arizona

1A

#### CHAINS

The west boundary of section 6, Township 23 South, Range 24 East, was surveyed in 1911 by A. N. Oliver. The west boundary was resurveyed and the remaining boundaries were surveyed in 1916 by S. E. Blout.

The following field notes are those of a metes and bounds survey of two tracts, one in the northwest quarter and one in the southwest quarter of section 6. The survey was requested by the Land Office, Phoenix, Arizona, for the sale of the tracts to the occupants under Public Law 87-851.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1947, and the Special Instructions dated October 2, 1964.

Only the true line bearings and distances for the surveyed lines are given in these notes. All corner points were monumented with standard iron posts  $2\frac{1}{2}$  inches in diameter, 30 inches long, flanged at the bases and with brass caps riveted to the tops.

The geographic position of the west one quarter corner of section 6 is: Latitude  $31^{\circ}27'15.2"$  North, and Longitude  $109^{\circ}57'21"$  West.

The magnetic declination was found to be 13°15' East.

Metes and Bounds Survey, Sec. 6, T23S, R24E, Arizona

From the  $\frac{1}{4}$  sec. cor. of secs. 1 and 6 on the W. bdy. of the township, monumented by an iron post 1 inch in diameter as described in the official record.

N. 27°29' E., 18.05 chs. to angle point 1, the point of beginning.

Set the iron post 23 ins. in the ground in a collar of stone to top, 2 ft. diam., cap mkd.

from which

The entrance to an old mine tunnel, now a source of water supply, bears S.  $65^{\circ}19^{\circ}$  W., 1.41 chs. dist.

A metal water tank,  $5\frac{1}{2}$  ft. diam.,  $5\frac{1}{2}$  ft. high, bears S.  $61^{\circ}57'$  W., 2.88 chs. dist., with a 2 in. pipe line leading to the water supply.

West, along the N. bdy. of the tract.

Over rolling land; desc. SW. slope.

Power line, bears S. 45° E. and N. 55° W.

CHAINS

12.75 Angle point 1, and the point of beginning.

General Description

#### Tract in NW1, Section 6

The general elevation of the tract is about 5,720 feet above sea level. The northeast portion consists of a brushy hillside and the source of the water supply. The remainder of the tract is gently rolling with a small stream of water flowing northwesterly through the property. The major improvements are located in the central portion, and consist of a house with an attached garage, a small building used for auxiliary sleeping quarters, a long shed housing chickens and pigeons and a water supply with gravity feed to a metal water tank.

The soil is a gravelly loam. There are scattered oak and alligator juniper trees with undergrowth of manzanita and oak brush in the northeast portion, and scattered oak brush and grass in the remainder.

Tract in SW4, Section 6

The general elevation of this tract is about 5,800 feet above sea level. The east portion consists of a brushy and stony west slope, and the remainder is gently rolling to nearly level. The improvements are located in the south central part of the tract and consist of a barn, corrals, loading chute, dipping vat and a cement floor for a house in process of building. The water supply consists of a pump and well in the northeast corner of the tract.

The soil is a gravelly loam and there is a medium to dense growth of manzanita and oak brush along the slopes to the east and west, with some grass in the central portion.
