

ARIZONA STATE OFFICE
BUREAU OF LAND MANAGEMENT

MINING DISTRICTS

This document is a listing of all Mining District Names listed on the Mining District Sheets on file at the Office of Cadastral Surveys, Arizona State Office, Bureau of Land Management.

The data is organized by:

1. Township referencing Mining District Number. - page 2 - 14
2. Mining District Number referencing Township Number. - page 15 - 27
3. Mining District Name referencing Mining District Number - page 28 - 35
4. Mining District Number referencing Mining District Name - page 36 - 43

At the end of the images of Mining District Sheets is an image of a U.S. Geological Survey Map upon which is annotated Mining District Numbers. This map was apparently compiled many years ago by Coe and Van Loo Consulting Engineers, Inc. Below the map is an alphabetical listing of the names of Mining Districts with a number assigned to each.

The Mining Districts and numbers assigned thereto were the starting point for the attached data. Each of the Mining District Sheets was examined for the names of Mining Districts. Whenever the name matched the one on the map then the name and number was used for the new listing. Whenever a new name was discovered then a new number was assigned continuing from the Coe and Van Loo system of numbering.

The user of this information should understand that Mining District Sheets are updated whenever new Mineral Surveys are approved or when a Mineral Survey is cancelled due to abandonment or other reason.

This listing is provided as an informational assistance to the user, but no warranty is implied for this listing.

The township numbers are in the format: AZ14xxxNxxxxE-50NW

AZ = Arizona 14 = Gila and Salt River Meridian
xxx = whole township numbers y will be "2" for half township numbers
N, S, E, W = direction from the initial point
50 = mineral survey information
NW, SE, SW, NE = quadrant of the township on the particular diagram

Users must check all information before assuming the correctness.
